Dear Foretravel Owner:

**This Notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.**

**Reason for this Recall:** Foretravel, Inc. has decided that a defect, which relates to motor vehicle safety, exists on certain 2003, 2005 and 2006 year model Foretravel U320T/U295T/NMBT/PHXT Series Motorhomes, equipped with Ridewell Tag axle assemblies containing Dana T-24 Axles.

These vehicles may have a missing axle serial ID Tag and/or axle spindle plug(s). The potential exists for debris to migrate into the oil bearing cup which could increase the risk of fire.

**What We Will Do:** Foretravel, Inc. with the support of Dana Corporation will repair all affected Tag axle assemblies which will include: Check for proper serial number ID tag and install if necessary. Inspect for and install spindle plugs if needed. If spindle plugs are missing, inspect, clean and if necessary replace tag axle bearings. This correction will be made at no cost to you.
