**DEFECT NOTIFICATION**

Dear Customer:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act of U.S.A.

Prévost Car Inc. has decided that a defect which relates to motor vehicle safety exists in certain 2004-2006 H3-41 & H3-45 Multiplex Coaches. Prévost Car Inc., as coach manufacturer, has recently noticed that:

On the previously mentioned vehicles, the lower wiper driving motor thermal protection may stop the motor if the motor has been in operation for a long time in second speed. This is due to the high amperage coming from the wiper motor and returning to the coach electrical system. The lower windshield wipers will not function in 1<sup>st</sup> speed, intermittently or in 2<sup>nd</sup> speed until the motor internal fuse has cooled down. To prevent this situation from happening, we strongly recommend that you make an appointment with your Prévost Car Service Center or that you contact your Regional Service Manager to have the new multiplex software program downloaded and the procedure performed.
