Re: recall 05V-390 update  
Date: **March 30<sup>th</sup> 2006**

03/30/06  
1:42

Dear Pat,

2006 MAR 30 P 1:42

Enclosed please find my third recall update.

DEFECTS INVESTIGATION

I will attach my spreadsheet to this again, as I did to the updates I sent you in October and December, as it's the main tool I keep updated to reflect the status of the trailers affected by the recall.

To date, of the 208 trailers affected by the recall, I have:

171 repaired & documented

6 are in various locations in Alaska, and will be repaired after the snow melts. (all of them have been located)

3 are in Australia, we have sent kits and just waiting for confirmation of the repair.

1 is in Nigeria, a kit was sent to repair it.

1 is in England, we have sent a kit to repair it.

2 are in Micronesia, kits have not been sent as of yet.

1 is in a retail persons hands in CA. And we are attempting to reach him.

1 is at a boat builders (Sea Ark) and kits have been sent to repair them

1 is in Hawaii, the owner has moved with no forwarding address, so far all correspondence has come back as undeliverable, we're still working on this one.

1 trailer listed on the sheet is a duplicate VIN number, in other words there are really 207 trailers affected, not 208

1 is in Washington State but the dealer has not found the paperwork yet to tell us the retail person's name.

4 are at one dealer's location in California, and we are sending an employee there to repair these.

2 are at other dealer locations in California and kits have been sent.

9 are in Canada, the Canadian distributor, Barrett marketing is trying to locate them.

1 is in Canada, and was confiscated by the Canadian Police so we can't have access to it right now.

2 are in Hawaii and the dealers (Ohana & Spectrum) are repairing.

The remaining 4 have been found but not as yet repaired.

We are continuing to send out notices to get 100% of the trailers repaired. There are several more that are repaired already, but the dealers are slow to report the repair to us, and I don't mark them as repaired until I have the backup documentation to prove it. So again, we have documented quite a few more repaired in this last quarter.

I hope this information is sufficient,

Sincerely

Rick Norman
