

05V-130

VEHICLE RECALL

**G-05507
August 2005**

SUBJECT: SAFETY RECALL (U.S., EXPORT)

**Child Seat Latch Attachment on CE, FE, and RE School
Bus models with Child Restraint Anchorage Systems
Option (Property Codes 0048SYH, SYJ, TAN, TGY, TGZ,
TJV, TMU, TMV, TMW, TMX, TNB, TPY, TXW) built
between 05-12-2003 and 03-02-2005**

DEFECT DESCRIPTION

The diameter of the latch attachment bars may be so large as to make it difficult to use with future car seat attachments. Not attaching the child seat properly may result in personal injury or death.

In addition, some of the latch attachments may be located too far forward of the seat back. This placement of the brackets may result in personal injury to a passenger not seated in a child seat.

MODELS INVOLVED

This recall involves CE, FE, and RE School Bus models built between May 12, 2003 and March 2, 2005 with Child Restraint Anchorage Systems Option (Latch Attachments) Property Codes 0048SYH, SYJ, TAN, TGY, TGZ, TJV, TMU, TMV, TMW, TMX, TNB, TPY, TXW.

PARTS INFORMATION

This table itemizes the parts in each kit and the quantity requirements per latch system or seat. **Parts Codes** are listed by VIN in Table 3 and the parts and **Repair Methods** to be used are shown by **Parts Code** in Table 4.

Table 1 - Parts		
Part Number	Part Description	Qty per
8900150R91	Kit - Belt, Infant Child Seat: Contains: 2212293C91 - Belt, Infant Child Seat (1) 180122 - HEX HD 3/8-16UNC X 1.0, ZND GRADE 5 (2) 120388 - WASHER, FLAT 3/8 ZND (2) 120382 - WASHER, LOCK, 3/8" ZND (2) 120377 - NUT, HEX 3/8-16UNC ZND (2) 2589943C1 - Instructions (1)	1 per latch system (when this kit is used)
8900171R91	Recall Service Kit, lt 39" 2 leg seats, STD: Contains: 440358003 - Seat Frame (1) 2204884C2 - Latch Attachment (4)	1 per seat replaced (when this seat is used)
8900173R91	Recall Service Kit, rt 39" 2 leg seats, STD: Contains: 440358004 - Seat Frame (1) 2204884C2 - Latch Attachment (4)	1 per seat replaced (when this seat is used)
8900177R91	Recall Service Kit, lt 26" 4 leg track seat, HB: Contains: 442393019 - Seat Frame (1) 2204884C2 - Latch Attachment (2)	1 per seat replaced (when this seat is used)
8900176R91	Recall Service Kit, rt 30" 4 leg track seats, HB: Contains: 442393008 - Seat Frame (1) 2204884C2 - Latch Attachment (2)	1 per seat replaced (when this seat is used)
8900172R91	Recall Service Kit, lt 39" 2 leg seats, HB: Contains: 440359003 - Seat Frame (1) 2204884C2 - Latch Attachment (4)	1 per seat replaced (when this seat is used)
8900174R91	Recall Service Kit, rt 39" 2 leg seats, HB: Contains: 440359004 - Seat Frame (1) 2204884C2 - Latch Attachment (4)	1 per seat replaced (when this seat is used)
8900168R91	Recall Service Kit, lt 39" 4 leg track seats, HB: Contains: 442393005 - Seat Frame (1) 2204884C2 - Latch Attachment (4)	1 per seat replaced (when this seat is used)
8900170R91	Recall Service Kit, rt 39" 4 leg track seats, HB: Contains: 442393006 - Seat Frame (1) 2204884C2 - Latch Attachment (4)	1 per seat replaced (when this seat is used)
421280008	BELT, SEAT*PASSENGER MAROON (Red) TE (Texas Only)	1 per seat replaced (when this seat is used)
421280009	BELT, SEAT*PASSENGER BROWN (Gold) TEX (Texas Only)	

SERVICE PROCEDURE

There are two (2) repair methods for this recall. Both methods are described in this section. The ***Repair Method*** required is dependent on the VIN of the bus. Using the last 8 digits of each VIN, look for the VIN in Table 3 (near the end of this document) and determine the correct ***Parts Code***. Look up the ***Parts Code*** in Table 4 (at end of document) to determine the correct parts, the quantity of each part, and the repair method required for each VIN. Customers located in AZ, GA, IL and MD will have the seat frames replaced. All other buses will be repaired with belt systems.

WARNING:

TO PREVENT SERIOUS EYE INJURY, ALWAYS WEAR SAFE EYE PROTECTION WHEN YOU PERFORM VEHICLE MAINTENANCE OR SERVICE.

WARNING:

TO AVOID PROPERTY DAMAGE, PERSONAL INJURY, OR DEATH WHEN SERVICING THE VEHICLE, PARK ON A FLAT LEVEL SURFACE, SET THE PARKING BRAKE, TURN THE ENGINE OFF AND CHOCK THE WHEELS.

Repair Method #1:

Remove latch attachments from seats and replace with a special belt system. This procedure does not require the removal of the seat assembly. Refer to Figure 1.

Remove existing latch system

1. Remove the bottom seat cushion for easier access to parts requiring changing.
 - For seats with the optional pivot clamp: Twist the clamp 90 degrees to allow pivoting the seat cushion up from the rear side.
 - For seats without the optional pivot clamp: Remove the seat clamps on the underside of the seat cushion.
 - If the seat has lap belts, remove them prior to cutting the brackets (in the next step) in order to prevent damage to the belt. Save the belts for possible future use. Keep the mounting hardware to use when installing the new belts.
2. Cut the brackets off just below the seat back cover. Refer to Figure 1 below.
 - The bracket makes a bend in this area and has a minimum amount of material to cut through. It can be cut off closer to the seat frame if desired.
 - There are two (2) brackets on 26" and 30" seats.
 - There are four (4) brackets on 39" seats.
3. Grind all cut edges smooth.
4. Paint.

Figure 1. Latch anchor brackets cut-off and belts installed

Install new system

- 1. On seats without existing lap belts** (Texas, North Carolina and Laidlaw only):
 - a. After removal of the latch system, add one set of belts and hardware provided in **Kit # 8900150R91** (at each position that the latch system was removed) using the holes provided in the bar that are approximately eight inches apart.
 - b. You may need to place a large diameter flat washer between the belt mounting bracket and the plate in the seat to get a flat mounting.
 - c. Torque the fasteners to **21-27 LbF-Ft (28.5–36.6 Nm)**.
- 2. On seats with existing lap belts** (Texas only):
 - Buses originally built with lap belts will require one replacement belt set for each latch system removed.
 - The replacement belt sets must match the same color scheme of the belts being replaced.
 - On 39" seats the center belt system is not being replaced. If this set was removed to prevent damage during the removal of the latch brackets (see *Remove existing latch system*, step 1), it should be reinstalled now.
 - When replacing a maroon/red belt set (Texas only) use 421280008 belt set: install the short female end on the wall side.
 - When replacing a gold/brown belt set (Texas only) use 421280009 belt set: install the short female end on the aisle side.
 - a. Use the existing hardware (see *Remove existing latch system*, step 1) to mount the new belt sets.
 - b. Torque the fasteners to **21-27 LbF-ft (28.5–36.6 Nm)**.

Repair Method #2 (Arizona, Georgia, Illinois and Maryland only):

Remove the seat frame and replace it with the newly designed latch system seat frame. This procedure requires the removal of the seat assembly. The new seat frame and the old seat frame should be the same style (standard or high back). Specifically, the **seat length** and **back style** should be the **same**. Two people may be required when removing and reinstalling the seat frame.

1. Remove the seat assembly from the bus.
 - Take care to note the location of the mounting hardware (including reinforcements) when removing it so that the new seat can be installed in the same manner as the old seat.
2. Remove the seat cushion from the seat frame.
3. Remove the upholstery from the seat back.
 - This requires removal of the staples from the tack bar located on the underside of the seat back. **Do not tear the upholstery.**
 - Observe how the upholstery was stapled so that you will know how to secure the upholstery in the same manner on the new seat frame.
4. Remove the foam assembly from the seat back frame.
5. Install the foam just removed from the old seat back frame onto the new seat back frame.
 - Make sure that the thicker foam is on the backside of the seat back frame.
6. Install the upholstery onto the new seat back (the upholstery removed from the old seat in step 3).
 - Make sure that the upholstery is pulled tight into position.
 - Use 3/8 staples to secure the front side of the upholstery first, then secure the backside of the upholstery.
7. Install the seat cushion (removed from the old seat frame in step 2) onto the new seat frame.
8. Reinstall the new seat assembly in the same manner and position that it was prior to being removed in step 1.
 - To access the seat rail mounting hardware, the seat cushion may be moved temporarily toward the aisle.
 - Make sure that the reinforcements removed in step 1 are reinstalled in the proper position.
9. Torque the nuts of the seat mounting hardware to the floor to
 - **13-16 LbF-Ft (17.6-21.7 Nm)** (seats without track seating)
 - **5-5.5 LbF-Ft (4.7-7.5 Nm)** (seats with track seating)
10. If a pivot bracket is provided, make sure that it is turned 90 degrees from the seat frame bar to secure the seat cushion.

End of Service Procedure.

LABOR INFORMATION

Table 2 - Labor		
Labor Code	Description	Time (hour)
A40-05507-01	Remove latch system and add belts - Method #1	0.3 per latch system
A40-05507-02	Remove seat frame and replace with new latch system seat frame design – Method #2	0.8 per seat

CAMPAIGN IDENTIFICATION LABEL

*Each vehicle corrected in accordance with this campaign **must be** marked with a S00109 Campaign Identification Label.*

Complete the label and attach on a clean surface next to the vehicle identification number (VIN) plate.

DO NOT REMOVE

DO NOT REMOVE

ADMINISTRATIVE/DEALER RESPONSIBILITIES (U.S. & POSSESSIONS)

Proceed immediately to make necessary correction to units in inventory. **All inventory vehicles subject to this recall campaign must be corrected prior to sale, transfer or delivery.** If vehicles have been sold or transferred and you are in receipt of Customer Notification Letters and Authorization for Recall Service cards for those vehicles, the transfer location or customer must be notified **IMMEDIATELY** from your dealer location.

Dealers must correct all vehicles subject to this campaign at no charge to the owner, regardless of mileage, age of vehicle, or ownership, from this time forward. The National Traffic and Motor Vehicle Safety Act, as amended, provides that each vehicle that is subject to a vehicle recall campaign must be adequately **repaired** within a reasonable time after the owner has tendered it for repair. A failure to adequately repair within **60 days** after a tender of a vehicle is prima facie evidence of failure to repair within a reasonable time. If the condition is not adequately repaired within 60 days, the owner may be entitled to **replacement** with an identical or reasonable equivalent vehicle at no charge, or to a **refund** of the purchase price less a reasonable allowance for depreciation.

However, consistent with the customer notification, dealers are expected to complete the repairs on the mutually agreed upon service date. To avoid having to replace an owner vehicle or refund the purchase price, every effort must be made to promptly schedule an appointment with each owner to repair his or her vehicle as soon as possible.

During the recall process, a listing of owner names and addresses will be furnished to the involved dealers to enable dealers to follow up with owners and have the vehicles corrected. You must limit the use of this listing to this campaign because the list may contain information obtained from state motor vehicle registration records and the use of such motor vehicle registration data for purposes other than this campaign is a violation of law in several states.

POSSIBLE CUSTOMER REIMBURSEMENT

There may be an occasion when a customer was charged for repairs related to this Recall prior to the Recall being released. The customer letter contains a statement for the customer to contact the Dealer if they believe they are entitled to reimbursement costs. The Dealer should follow the Customer Reimbursement guidelines in Warranty Policy Letter 03-001G. The Warranty Procedures and Administrative Policies manual (CTS1100) includes the information in Policy Letter 03-001G.

WARRANTY CLAIMS

Refer to Dealer Warranty Manual for procedures to conduct Recall Campaigns. It is important that the Recall Coding be completed properly to assist in processing the warranty claim. Complete instructions will be found in the Warranty Manual, Section 7-1. Special attention should be given to Items 39 through 44:

GROUP	NOUN	C	WARR.	TP	PAD
GROUP Enter number G—	NOUN Leave blank	C (CAUSE) Enter either 1, 2, 3. (see below)	WARRANTY (Warranty Code) Enter 40.	TYPE PART Enter P for type part causing failure.	PAD Enter 100
		1. Inspected (No repair required).			
		2. Inspected and repaired.			
		3. Defective part from parts stock.			

ADMINISTRATIVE/DISTRIBUTOR RESPONSIBILITY (EXPORT)

Proceed immediately to make necessary correction to units in inventory. All inventory vehicles subject to this recall campaign must be corrected prior to sale, transfer or delivery. If vehicles have been sold or transferred and you are in receipt of Customer Notification Letters and Authorization for Recall Service cards for those vehicles, the transfer location or customer must be notified from your distributor location.

Export locations are to submit warranty claims in the usual manner making reference to this Recall number.

We ask for your full cooperation and follow-up to this important subject matter. If you have any questions or need further assistance, please contact the Regional Service Manager at your regional office.
