Safety Recall Reminder: Ignition Switch Interlock

In March 2005, we notified you of a safety recall involving your 3.2TL. The ignition switch in your vehicle may contain a defective component, leading to excessive wear and improper interlock operation. Interlock failure may allow the ignition key to be removed when the gear selector lever is not in Park. To fix this problem, your dealer will inspect the ignition interlock and replace all needed parts. *This inspection and any needed repairs will be done free of charge.*

According to our records, you have not yet had your vehicle repaired. Please contact your Acura dealer immediately and make an appointment for the repair.
