VEHICLE SAFETY DEFECT SERVICE BULLETIN

Recall Campaign 05V081000

Monaco File # RO4064

Re: Safety Recall- Battery Cable Workhorse

2nd Notification

Dear Owner:

This is a follow up to a notice that was sent to you on March 18, 2005.

Monaco Coach Corporation has decided that a defect which relates to motor vehicle safety exists in certain motorhomes manufactured from August 12, 2004, through December 17, 2004.

Monaco became aware of a possible deficiency in battery cables not secured properly inside of the chassis frame rail. The battery cable may be too near to the engine exhaust. This defect could potentially melt the battery cable and cause a back feed through the chassis 12V system which could cause a short, which may potentially lead to a fire. Driving a motorhome with this defect could result in injury or loss of life.

According to our records the recall campaign service has not been performed on your motorhome. We encourage you to have the recall service completed as soon as possible. Please contact Monaco Recall Hotline at 800-685-6545 if you need any assistance. If you no longer own this vehicle, please fill out the included postcard section of the recall notification form, tear off and mail back to Monaco Coach Corporation so we may notify current owner.

The affected units are:

2004-2005 Monaco Monarch SE
2004-2005 Holiday Rambler Admiral SE
2004-2005 Safari Trek
2004-2005 Safari Simba

According to our information, your Class A Motorhome identified on the enclosed form is affected. Federal law requires that any vehicle lessor receiving this recall notice must forward a copy of this notice to the lessee within ten days.

The remedy involves visually inspecting the battery cable to see if it is properly mounted inside of the chassis frame rail. It may be necessary to mount the battery cable securely in existing holes in frame rail by using $\frac{1}{4}$ x 20 x 1" hex bolt with $\frac{1}{4}$ " flat washer and $\frac{1}{4}$ x 20 myloc nuts.

The recall repair will be performed at no cost to you. If you paid to have this repair completed prior to receiving this letter, you may be eligible for a reimbursement.

The labor time necessary to perform this recall campaign is approximately 0.50 hours. Please ask your dealer if you wish to know how much additional time may be needed to schedule and process your motorhome.

The enclosed form identifies your motorhome and will serve as an authorization and claim form to have the correction made. Presentation of this form to your dealer will assist in making the necessary correction in the shortest possible time. If you have sold or traded your motorhome, or for any reason cannot have this recall service performed, please let us know by completing the postage paid reply card and returning it to us promptly.

Your Monaco Coach Corporation dealer is best equipped to provide service to ensure your motorhome is corrected as promptly as possible. If, however, you take your unit to your dealer on the agreed service date and the dealer does not remedy this condition on that date or within three (3) days, please call our toll free recall hotline at (800) 685-6545 or our toll free number for Technical Service at (877) 466-6226.

If, after contacting your dealer, and the recall assistance service line, you believe Monaco Coach Corporation has failed or has been unable to remedy the noncompliance without charge or there has been an unreasonable delay in securing the remedy, you may submit a complaint to the Administrator, National Highway Traffic Safety Administration, 400 Seventh Street, SW, Washington, DC 20590; or call the toll-free Vehicle Safety Hotline at 1-888-327-4236 (TTY:1-800-424-9153); or go to <http://www.safercar.gov>.

We apologize for any inconvenience that this may cause you, but your safety is very important to us.

Sincerely,

Michael Becker
Customer Service Manager
Monaco Coach Corporation
