SAFETY RECALL NOTIFICATION – R3150510 – 4M50 Idler Gear Bushing
NHTSA SAFETY RECALL – 05V-411

Vehicle Identification Number – VIN

Dear Mitsubishi Fuso Truck Owner:

This is a follow up to notices you should have received dated December 20, 2005 and May 3, 2006 regarding this Safety Recall.

Mitsubishi Fuso Truck of America, Inc. has decided that a defect which relates to motor vehicle safety exists in the 4M50 engine idler gear bushing. On affected vehicles, the cylinder head idler gear bushing may have been improperly machined, causing excessive stress on the cylinder head idler gear shaft. Continued operation in this condition could cause the idler gear shaft flange to break and generate abnormal engine noise and/or engine oil leaks. In the worst case, the engine could stall and not restart, causing a crash without warning.

Continued on the back.
