Subject: RE: NHTSA notification of Peterbilt recall 706B - Cummins ICON Electronic Service Tool

This recall consists of 24 Peterbilt model 379s and 16 387s manufactured between July 2, 2004 and May 17, 2005.

If you need any further information, please let me know. I've recently taken over for Dick Slosson and am still in the thick of the learning curve.

Thank you!
