Re: **Kenworth Cruise Control/Honeywell Pressure Sensing Switch (#76585 & K301-394)**
Kenworth Recall No.: 06KW4

Dear Mr. Person:

PACCAR Inc is furnishing notification to NHTSA in accordance with 49 CFR Part 573 "Defect and Noncompliance Reports." This motor vehicle safety defect involves vehicles manufactured by the Kenworth division of PACCAR Inc.

Description of the Defect

Kenworth installed the wrong pressure sensing switch in its cruise control system as the switch manufactured by Honeywell Hobbs was mislabeled. With the incorrect switch installed in the cruise control system a light application of the brakes will not de-activate the cruise control and the system will have to be shut off by the dash switch.

Identification of Affected Vehicles

Kenworth has identified 38 affected vehicles, model T300 manufactured between October 11, 2006 and October 17, 2006.

Chronology of Events Leading to Recall

On October 20, 2006 the PACCAR Ste. Therese manufacturing facility discovered during testing the cruise control function could not be deactivated with a light application of the brakes. Kenworth worked with Honeywell to determine that the sensor switches received from Honeywell on or about October 10, 2006 were mislabeled.

Description of Remedy

Kenworth will install the correct sensor switch into the affected vehicles.

Identification of Recall Schedule

The Kenworth number for this campaign is "06KW4". Kenworth will administer the recall.

Very truly yours,
