Contact Customer:	Yes
Destroy in Field:	NO
Return Authorization:	Yes
Return Location:	Colmar
Issue Credit:	Yes
Apply to Defective All:	NO

Notes/Comments:

We have a potential quality issue with our CMFI Fuel Return Lines for the GM Astro, Safari, S-Series Pickup, Blazer, Jimmy, Sonoma, Typhoon and Bravada with 4.3L Engine 1995-92.

An audit has determined that in some of our inventory the valve in one of the lines may be not fully torqued, possibly allowing a fuel leak.

To be cautious we would like all warehouse and store inventory of this product returned to us for inspection.

We regret the inconvenience this causes. Replacement inventory will become available as we complete our 100% quality audits. There will be some disruption in supply as we go through this process, and although we do not yet have an "in stock" date, please be assured that we will be making every effort to quickly replenish inventory. We will provide updates as to availability next week.

Please review the customer sales report (attached). All customers **MUST** be contacted to have this product returned.

Again, we apologize for this issue. We are eager to prevent any problems in the field and committed to a quick resolution.
