

Campaign 60601-C involving 8.1 Engine Fuel Rail Clips

**September 6,
2006**

ATTENTION: SERVICE MANAGERS, SERVICE ADVISORS AND SERVICE TECHNCIANS

Note that **Campaign 60601-C involving 8.1 engine fuel rail clips has been added to the campaign bulletins section of WOW**. This campaign involves all 2004 and 2005 models and certain 2006 models. There are approximately 32,000 Workhorse units involved. GM will also campaign the 8.1 engine fuel rail clip as used in some GM vehicles. **Dealers must check the individual VIN profile in WOW to confirm that a particular unit is involved and to determine if unit has already been completed.**

Customer mailing will start this week and will last for approximately 2 weeks. **The campaign was posted on the NHTSA web site several weeks ago and a number of units have been completed before the Workhorse announcement.**

Parts are available through the normal Workhorse Parts system. However, the clip will be sent directly to involved owners with the customer letter with instructions to take the clip to a certified Workhorse dealer to complete the requirements of the campaign.
