

Mack Trucks, Inc.

Safety

Recall

ALERT

Date: October 17, 2006 **Number:** SRA-222-001
To: All U.S. & Canadian Distributors
Attention: Service Manager, Warranty Manager, Parts Manager, Dealer Principal
From: Regulatory Affairs Department
Subject: Safety Recall, SC0317, ASET™ AC Fuel Injection Lines

Safety Recall Summary:

On certain Mack model vehicles (CH, CHN, CX, and CXN) manufactured from January 2002 through October 6, 2006 with ASET™ AC model engines, there exists the potential that a leak in the fuel injection line may spray fuel on the Exhaust Gas Recirculation (i.e. EGR) pipes that carry hot exhaust gases, which could potentially result in an engine fire.

The number of vehicles affected is approximately 38,000.

Dealer's Responsibility:

The National Traffic and Motor Vehicle Safety Act and Canadian Motor Vehicle Safety Act requires dealers to ensure that all new and used vehicles are free of safety defects and comply with all relevant safety standards at the time of delivery to the consumer.

Dealers should make their personnel aware of the safety recall. In the event that a dealer has a vehicle included in the safety recall in their inventory to be sold, the condition must be corrected before releasing it to a customer.

Release Schedule:

- Repair Instructions are tentatively scheduled for release no later than December 20, 2006.
- Vehicle list is tentatively scheduled to be posted on the Trucks Dealer Portal by November 2, 2006.
- Owner Notices are tentatively scheduled to be mailed no later than January 2, 2007.
- Mack Trucks understands the need to have parts and repair instructions available as soon as possible and is working to improve on the delivery times listed in the release schedule.

Questions:

Contact the Regulatory Affairs Department at vtna.regulatoryaffairs@volvo.com if you have questions.
