SERVICE BULLETIN #400

TO: ALL BRANCH MANAGERS, DEALER PRINCIPALS, SERVICE, PARTS
AND SALES MANAGERS

FROM: Barry A. Mitchell
Director, Customer Service/Warranty

SUBJECT: **Brass Craft 225-6 Fittings (G.D. Part 41902005)**

Brass Craft of Canada, Inc. (BCI) the manufacturer of brass "street" tee fittings being used under Great Dane part number 41902005 is currently investigating shipments of fittings to our production facilities for possible defects.

BCI will shortly have all potentially defective parts inventory removed from our plants and finished trailers remaining at the plants retrofitted. Upon completion of these tasks, Great Dane will be able to determine the population of trailers in the field that have been effected by this potential defect. Brass Craft is currently working on inspection and repair procedures for field repairs for the trailers that have shipped from our plants.

Until these instructions are available you should hold all trailers at your facility that have the manufacturer date of 7/06 and 8/06 stamped on the VIN plate and not release them into service until we can inform you of the appropriate inspection and repair necessary to address these issues. Savannah produced trailers are the only trailers that are not affected by the issue.

We will be updating you as soon as information is available which we hope will be early next week.
