Dear Mr. Person:

The enclosed communication is being provided pursuant to 49 CFR Part 573.6(c)(9).

Technical Compliance Department

Encl.

06V-459

Subject: 2004-2006 Nissan Titan King Cab - Stop Sale

Attention: Dealer Principal, Sales, Service and Parts Managers

***** Campaign Announcement *****

Nissan is conducting a Voluntary Recall Campaign on approximately 100,000 Model Year Nissan Titan King Cab vehicles. In some affected vehicles, the wires in the harness routed through the rear doors and into the body may break due to over bending of the harness as the doors are opened and closed. If this happens, there is a possibility that a pretensioner may deploy and it would be impossible to use the seatbelt. On the passenger side, there is also a possibility that the passenger side front air bag will not deploy as designed in a frontal collision.

***** Dealer Inventory *****

Federal law requires that new vehicles in dealer inventory which are the subject of a safety recall must be corrected prior to delivery under a sale or lease. Failure to do so can result in civil penalties by the National Highway Traffic Safety Administration (NHTSA).

IMPORTANT

2004, 2005, 2006 Titan King Cab new vehicles in Dealer Inventory affected by this campaign MUST BE PLACED ON SALES HOLD IMMEDIATELY to await inspection and repair of the rear king cab door wiring harness (left and right rear door). There are approximately 2,011 unsold vehicles in dealer inventory affected by this retail sales hold.

***** Vehicle Identification *****

VIN List - Contact your Dealer Parts and Service Manager (DPSM) for further direction, as they will be provided with a list of affected VIN's by dealer.

***** Parts Availability-Dealer Inventory *****

To ensure parts availability to all dealers, Nissan will schedule an automatic shipment of harness service kits to dealers beginning the week of 12/18. The harness service kit for this campaign will be on parts sales restriction during the launch of this campaign. We will notify you of any changes to the parts shipment schedule or should there be any other changes.

*****Special Tool *****

Special tool, Vinyl Tube Scissors, is required to complete this campaign repair. This special tool has been shipped to your dealership. If this tool is not received by December 20, please contact TECH-MATE at 1-800-662-2001.

***** Repair Instructions/Parts Availability *****

The rear king cab door wiring harness (left and right rear door) needs to be inspected for damage to the vinyl tube. If no damage is found, then replace the vinyl tube with corrugated tube as identified in the Campaign Bulletin. If damage is found, then the wiring harness needs to be replaced utilizing procedures outlined in the Titan service manual.

Nissan is developing the Campaign Bulletin containing repair instructions and related parts and claim information. You will be notified when the bulletin and required parts become available.

***** Owner Notification *****

Nissan expects to notify owners beginning in February 2007.

If you have any additional questions related to this campaign, please contact your Dealer Parts and Service Manager (DPSM).
