

IMPORTANT RECALL NOTICE

[RECALL 158: REPLACING FUEL LINE IN ENGINE BAY
SAMPLE OWNER NOTIFICATION LETTER
UNITED STATES]

June 2006

Dear Volvo Owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

The reason for this campaign:

Volvo Cars of North America, LLC. (Volvo) has decided that a defect related to motor vehicle safety exists in the fuel line of certain model year 2004.5, 2005, 2006 S40 and 2005, 2006 V50 vehicles equipped with the T5 engine.

The polyamide tube (PA12) in the fuel line located in turbo/exhaust manifold may become sensitive due to extreme temperatures. In some cases, this may potentially result in fuel line leakage after parking the vehicle. If leakage occurs, the vehicle may be unable to start or you may detect a fuel odor. Fuel leakage, in the presence of an ignition source, could result in a fire.

The corrective action will be to replace the fuel line with a tube of a modified design, with a material that can withstand the extreme temperatures.
