

*FEDERAL TIRE LABEL
REPLACEMENT INSTRUCTIONS*

30 October 2006

Subject: Recall 06V-262
CCI# 10762

Dear Country Coach Owner:

Under Recall 06V-262 replacement Federal Tire label are required. Enclosed are two (2) replacement Federal Tire Labels and a Manufacturer's Label. Please install these labels as described below:

RED BORDERED FEDERAL TIRE LABEL:

1. Placement of this label is on the driver's side wall adjacent and above the driver's seat for more visibility.
2. Using a clean dry cloth, wipe the surface where the label is to be affixed.
3. Carefully peel the red bordered Federal Tire label from its backing and apply gently to the wall.
4. Place the protective Mylar cover over the label.

BLACK BORDERED FEDERAL TIRE LABEL & MANUFACTURER'S LABEL:

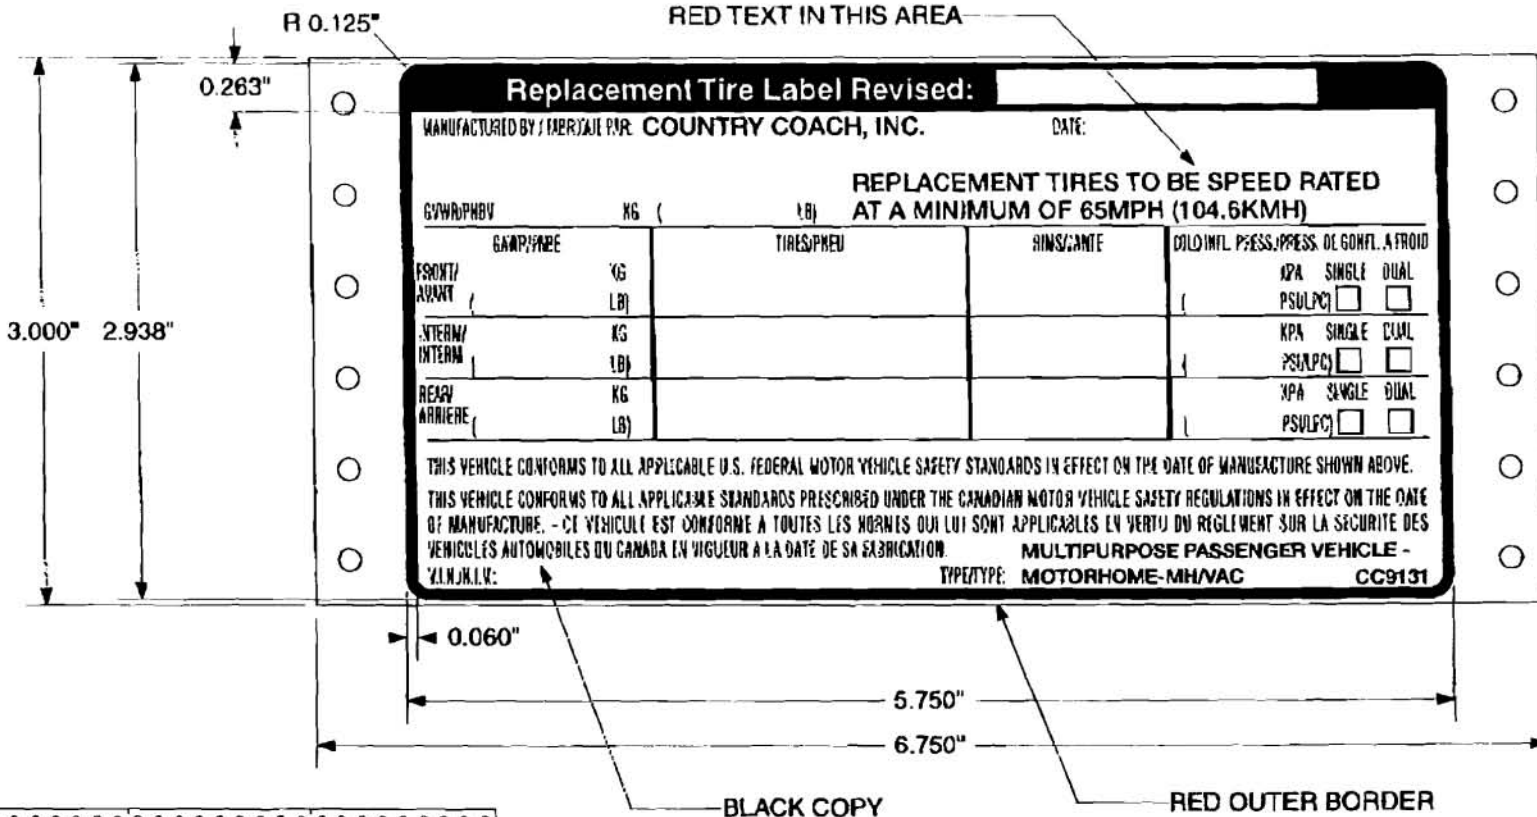

1. The Federal Tire label is located on the face of the shifter panel to the left of the driver's leg. Directly below it is the Manufacturer's label.
2. The existing Federal Tire Label may be removed by gently peeling the protective Mylar cover from one of the corners. Slowly peel the protective Mylar cover so as not to damage the fabric surface. As the protective Mylar cover peels off the fabric, the Federal Tire label and Manufacturer's label will remain attached to it. Some of the tire label will remain attached to the fabric. The tire label is a tamper proof label and is designed to have small squares peel off the original label when disturbed. It is not necessary to remove the remaining squares from the fabric.
3. The fabric surface should not be cleaned with any product containing chemicals or citrus.
4. Carefully peel the replacement Federal Tire label from its backing and apply gently to the shifter panel face in the same place as the removed label. Repeat the same process for the Manufacturer's label placing it directly below the tire label.
5. Finally, place the new protective Mylar cover over the Federal tire label and Manufacturer's label, similarly to the removed protective Mylar cover.
6. If you are unable to remove the old labels, place the new labels over them and apply the new Mylar cover.
7. The removed Federal Tire label and Manufacturer's label, or as much as can be salvaged, are to be returned to the Country Coach Compliance Department in the self-addressed stamped envelope included with the labels. If you are unable to remove or return the old labels, please complete the enclosed form and return in the self-addressed stamped envelope.

Please install the revised tire labels and ALWAYS maintain your tire inflation pressures as indicated on the Federal Tire labels. Installation of the Federal Tire labels and on-going tire inflation pressure maintenance are very important steps in the completion of this recall.

Thank you for your assistance in this matter.

Sincerely,

Dick Sabath
Senior Manager, Compliance Administration

THIS ARTWORK HAS BEEN MODIFIED FROM ITS ORIGINAL FORMAT

This approval is not intended for visually proofing color unless specified otherwise.

A FULL SCALE Die Line Drawings not supplied

We warrant this approval so that you may have the opportunity to make changes or corrections. Please verify elements of design, type styles, sizes, spelling, and dimension specifications. If a customer blueprint was submitted, any dimensions not shown reflect this print. How ever, tolerances given refer to the customer print per Dec-O-Art's manufacturing capabilities.

If your approval is required. No further work can be done until we receive your approval or changes.

A FULL SCALE Die Line Check Sheet is not supplied

We submit this approval so that you may have the opportunity to make changes or corrections. Please verify elements of design, type styles, sizes, spacing, and dimensions specifications. If a customer alteration was indicated, say dimensions not shown called that point. How ever, tolerances given separate customer's print per Dec-O-Art's standardizing regulations.

Your approval is required. No further work can be done until we receive your approval or changes.
