I M P O R T A N T

- Your vehicle is involved in recall 06077.
- Schedule an appointment with your GM dealer.
- This service will be performed for you at **no charge**.

Why is your vehicle being recalled?

In these vehicles, an internal control and check valve within the air brake application valve assembly was configured improperly, preventing air from flowing through the brake system as designed. In the event of an emergency stop, the vehicle's stopping distance would be increased. If stopping distance was limited, a vehicle crash could result.

What will we do?

If your vehicle is a Chevrolet Kodiak, GMC TopKick, or Isuzu HVR, your dealer will replace the air brake application valve assembly. This replacement will take approximately 3 hours and 50 minutes to complete.

If your vehicle is a Chevrolet or GMC T-Series or an Isuzu FVR, FXR, your will dealer will reroute the air brake lines. This reroute will take approximately 30 minutes.

This service will be performed for you at **no charge**. Because of service scheduling requirements, it is likely that your dealer will need your vehicle longer than the service correction time shown above.

What should you do?

You should contact your dealer to arrange a service appointment as soon as possible. Bring the enclosed customer reply form with you when you visit your dealer. The form identifies the repairs required. If you no longer own this vehicle, please let us know by completing the form and mailing it back to us.
