Re: 2007 MasterCraft Trailer Wheel Recall

Dear Mr. Hutton:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

MasterCraft has decided that a defect which relates to motor vehicle safety exists in certain 2007 model tandem-axle boat trailers. According to our records, you purchased a 2007 model MasterCraft tandem-axle boat trailer that may have been equipped with potentially defective wheels that were distributed to MasterCraft Boat Company, LLC ("MasterCraft") by Jetstar Trailer Tire and Wheel, a Division of JCA Corporation ("Jetstar"). Failure of the wheel to seat properly and securely on the wheel hub can occur. This can cause the lug nuts to become loose even after being tightened to the proper torque specifications. Loosening of the lug nuts could result in the eventual loss of one or more of the nuts and/or wobbling of the wheel while in motion which would progressively worsen and could lead to shearing of the lug bolts and/or loss of the lug nuts, either of which would result in loss of the wheel. If this occurred during transit, loss of a wheel could result in loss of control of the tow vehicle, especially when hauling a boat on the trailer, increasing the risk of a crash.

MasterCraft has initiated a product recall affecting the 2007 model year MasterCraft tandem-axle trailers which utilize the 14-inch Jetstar wheels. It has been determined that these wheels may be unsafe. Your MasterCraft Dealer has been notified of this product recall. Please contact your MasterCraft Dealer to schedule a time for inspection of the wheels on your trailer, and the replacement of any wheels which are found to be defective upon inspection. Any necessary replacement wheels are covered by your warranty and you will not be charged for the inspection and/or replacement of any wheels, although you will be responsible for the transportation of your trailer to the dealership. Please contact your MasterCraft Dealer to schedule the service as soon as possible.

Prior to transporting your MasterCraft trailer to your nearest MasterCraft Dealer, you must:

- Check the torque on your lug nuts. (The torque should be set at 90-ft-lbs.)
- Check to ensure that your tires are properly inflated in accordance with the pressure rating listed on the side of the tire.

This recall has been initiated to serve in the best interest of you as a MasterCraft customer, our Dealers and the Company. We realize and understand the importance of our products operating in a safe and reliable manner. We sometimes encounter an area of sub-standard quality that may cause actions such as a recall to be initiated. This is our responsibility to you, the consumer, when recognition of a potential quality issue is verified and validated. We ask for your patience, understanding and cooperation with regard to this recall.

Federal regulations require that any vehicle lessor receiving this recall notice must forward a copy of this notice to the lessee within ten days.

We regret any inconvenience that this action may cause you. However, we are concerned about your safety. If your dealer fails or is unable to remedy this defect without charge and within a reasonable

time, you may submit a written complaint to the Administrator, National Highway Traffic Safety Administration, 400 Seventh Street, SW, Washington, DC 20590, or call the toll free Vehicle Safety Hotline at 1 888-327-4236; (TTY: 1-800-424-9153); or go to <http://www.safercar.gov>.

We also ask that you accept our most sincere apologies for any and all inconvenience caused due to the implementation of this product recall. MasterCraft is committed to product excellence, as well as world-class customer service in an effort to support continuous improvements in our products. Thank you for your cooperation.

Sincerely,

MASTERCRAFT BOAT COMPANY, LLC
