Toyota will initiate a Special Service Campaign to inspect the Firestone 97S Destination LE P215/70R15 tires equipped on certain early 2006 model year Tacoma 2WD vehicles.

During the tire-to-wheel assembly process for certain early 2006 model year Tacoma 2WD vehicles equipped with Firestone 97S Destination LE P215/70R15 tires, there is a possibility that the inner and/or outer beads of the tire may have been damaged. If the bead is damaged, a bulge may develop on the sidewall of the tire and/or air may leak from the area of the damaged bead.

The following vital information is provided to inform you and your staff of the owner notification phase of the campaign and your degree of involvement.

1. **Dealer Letter Mailing Date**

The attached Dealer Letter will be sent to all Toyota dealers in early March, 2006.

2. **Owner Notification Mailing Date**

The owner notification will commence in mid-March, 2006.

Please note that not all vehicles in the VIN range are affected by this SSC. If a dealer is contacted by an owner of an involved vehicle, who has not yet received a notification, please instruct them to **verify eligibility by confirming through Dealer Daily/TIS prior to performing the inspection and if necessary tire replacement.** Dealers should perform the inspection as outlined in the attached Technical Instructions.

3. **Number of Vehicles Involved**

There are approximately 12,000 Tacoma 2WD (early 2006 model year) vehicles involved in the U.S. However, not all vehicles will require tire replacement. We have enclosed the following SSC 60A Summary Reports in the Region/Private Distributor (PD) Service Manager/Customer Service Operations Manager/Director of Service package:

- Region/PD Summary Report that provides an overview of the entire Region/PD for this SSC.
- A District Summary Report that indicates the number of involved vehicles per dealership in each district for this campaign.

5. Vehicles in Dealer Stock

As required by Federal Regulation, dealers are not to deliver any vehicle acquired in their inventory, which is involved in a safety recall, until the necessary inspections/replacements have been performed.

6. Parts Ordering

The tires will be ordered through a local participating Bridgestone/Firestone dealer. Bridgestone/Firestone will deliver the tires free-of-charge, however, any unused tire(s) must be returned or the Toyota dealership will be invoiced by the Bridgestone/Firestone dealer.

We have made arrangements with Bridgestone/Firestone to allow Toyota dealerships to order an initial supply of 5 tires if the dealership UIO is at least one vehicle. Dealerships with a greater number of vehicles will be allowed to order up to an initial supply equal to [UIO x 5 tires x 30% NG rate] x 10% initial stock. Dealerships that do not have a vehicle in their UIO should only order tire(s) on an as-needed basis.

To order the tires, dealerships should refer to the attached list which will help locate the nearest participating Bridgestone/Firestone dealer in their area. Please refer to the table below and the Technical Instructions for part number information. Other necessary parts can be ordered through the dealer's facing PDC.

Part Number	Part Description	Qty.

Note: This campaign entails inspection of each tire and **individual replacement only if the tire is damaged based upon the Technical Instructions**. Please refer to the technical instructions for inspection procedures.

If it becomes necessary to replace a tire, the Toyota dealership must indicate the damaged area of the bead, drill a hole in the sidewall of the tire and make arrangements with the Bridgestone/Firestone dealership to pick-up the NG tire (please refer to the technical instructions for details). Bridgestone/Firestone will do a secondary tire inspection, and Toyota dealerships may be charged for tires that have been inappropriately replaced. Dealers will also be charged for any tires not returned that remain in their stock after the program has ended.

Dealers will be reimbursed \$6.00 per tire for wheel weights and other incidentals. These costs are to be claimed as sublet type 'TY' on the warranty claim. (NOTE: Wheel weights may not be listed as replacement parts if claimed as a sublet.)

The following parts may be necessary *if they are damaged during the repair*:

What should you do?

Please contact your authorized Toyota dealer to make an appointment to inspect the tires, as soon as possible. The inspection will take approximately two hours. However, depending upon the inspection results and the dealer's work schedule, it may be necessary to make your vehicle available for a longer period of time.

We request that you present this notice to the dealer at the time of your service appointment.

If you no longer own the vehicle, please indicate so on the enclosed postage-paid form, providing us with the name and address of the new owner.

What if you have other questions?

Your local Toyota dealer will be more than happy to answer any of your questions and set up an appointment to perform the inspection. If you require further assistance, you may contact the Toyota Customer Experience Center at 1-888-270-9371 Monday through Friday, 5:00 am to 9:30 pm, Saturday and Sunday 7:00 am through 3:00 pm Pacific Standard Time.

IV. COMPONENTS

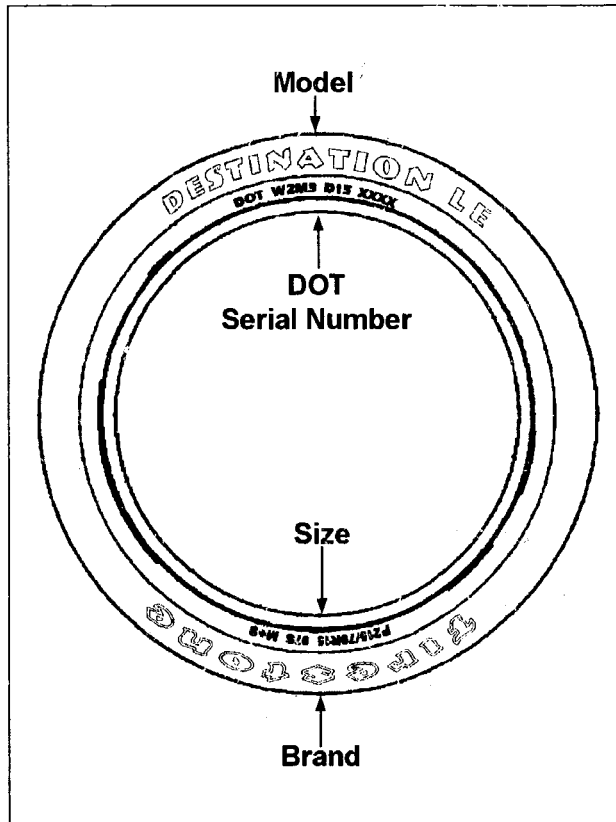

V. BACKGROUND

During the tire to wheel assembly process for the 2006 Tacoma 2WD equipped with Firestone 97S Destination LE P215/70R15 tires, there is a possibility that the inner and/or outer beads of the tire may have been damaged. If the bead is damaged, a bulge may develop on the sidewall of the tire and/or air may leak from the area of the damaged bead.

VI. WORK PROCEDURE

A. DETERMINE IF THE TIRES ARE AFFECTED

B. TIRE REMOVAL

1. CONFIRM IF THE TIRES ARE AFFECTED

a) Confirm the following on all 5 tires, including the spare, to determine if they are affected.

- **Brand:** Firestone
- **Model:** Destination LE
- **Size:** P215/70R15
- **DOT Serial Number:** W2M3 D15 ****

NOTE:

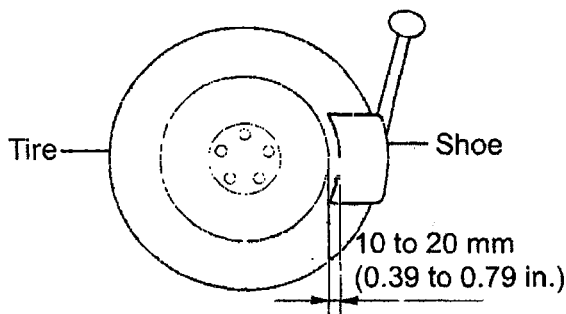

(*) represents any combination of numbers or letters.

b) Are the tire(s) affected?

- **YES:** The tire(s) must be removed from the wheel and inspected.
- **NO:** The tire(s) does not need to be removed or inspected.

2. REMOVE ONLY THE AFFECTED TIRE(S) FROM THE VEHICLE

a) Remove **ONLY** the affected tire(s) from the vehicle and mark their original installation position on the back of each tire and wheel (L/F, R/F, L/R, R/R, S for spare).

NOTE:
The shoe(s) of the tire changer shown above may differ from the one actually used.

3. REMOVE THE TIRE PRESSURE WARNING VALVE AND TRANSMITTER (VALVE SENSOR)

- a) Remove the cap and valve core to release the air from the tire.
- b) After the air has been released, remove the nut and washer that are used to secure the valve sensor to the wheel and allow it to drop inside the tire.

NOTE:

Keep the cap, valve core, nut and washer as they will be reused.

- c) After dropping the valve sensor into the tire, separate the tire beads from the wheel using the shoe(s) of the tire changer.

NOTE:

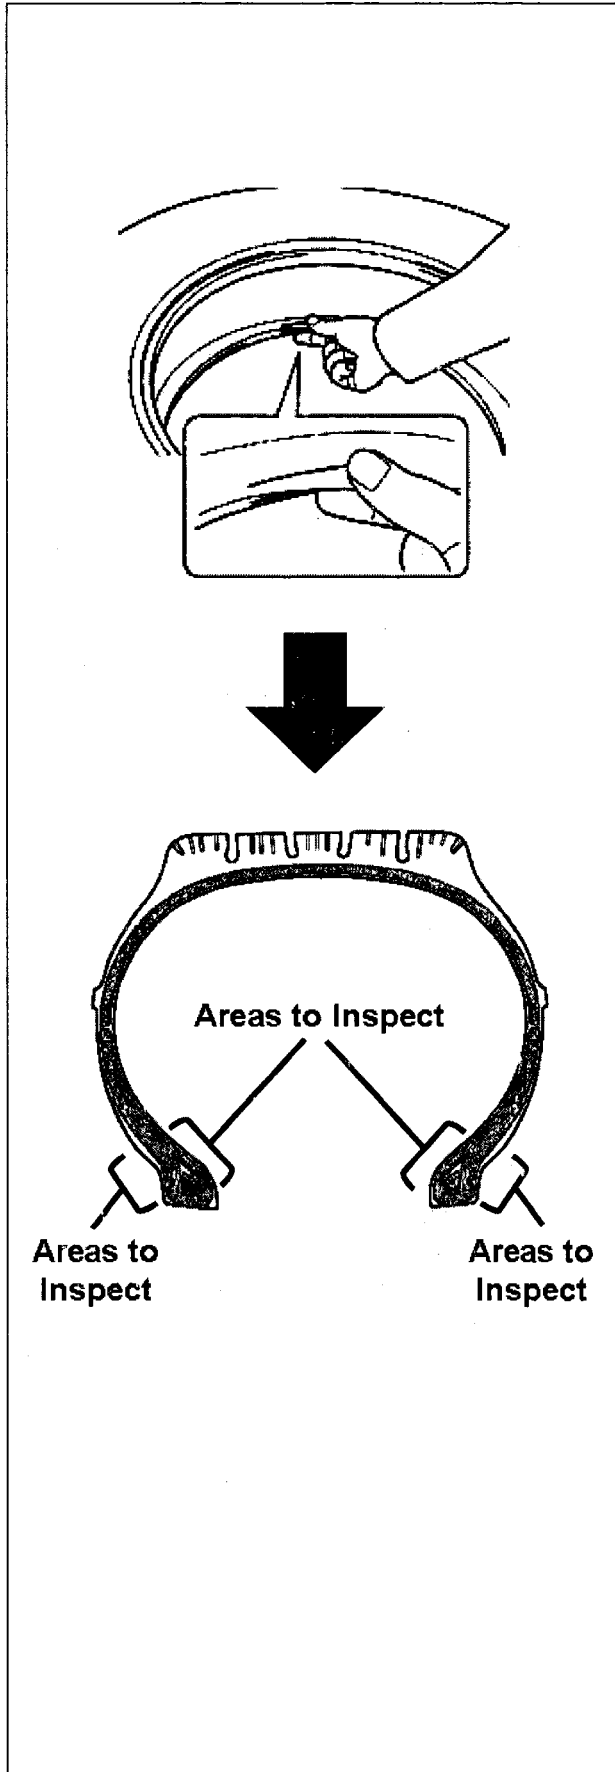

Always drop the tire pressure warning valve and transmitter (valve sensor) into the tire first. Otherwise, the tire bead and valve sensor may come into contact with each other, causing damage to the valve sensor.

- d) Dismount the outer bead from the wheel.
- e) Remove the valve sensor from the tire.
- f) Dismount the inner bead from the wheel and remove the tire.

NOTE:

Inspect the grommet for cracks or damage. If any cracks or damage is found, the grommet, as well as the washer and nut must be replaced.

C. TIRE INSPECTION

1. INSPECT THE TIRE BEADS

- a) Thoroughly inspect each tire's inner and outer beads for cuts, tears, or other abrasions on both the inside and outside area of each tire (as indicated in the illustration), by pressing down all areas of the beads by hand.

Cuts, tears or other abrasions found on the tire bead(s):

- Clearly mark the damaged area(s) with tire chalk.
- Replace the damaged tire(s) with a new one.
- Record the DOT serial number of the replacement tire(s) on the Repair Order and register the tires by one of the following methods:

- a. Tires can be registered by logging on to <http://dealertire.com> this will take you to the Toyota Tire Center web site.

OR

- b. Contact your local participating Bridgestone/Firestone dealer for DOT Tire Registration Cards. Fill out and submit the card.

- Drill a hole in the sidewall of the damaged tire(s), and attach a tag with the VIN number and a copy of the Repair Order for each tire replaced.
- Return the damaged tire(s) to your Parts Department, as they will be recovered by Bridgestone/Firestone, and a secondary tire inspection will be performed.

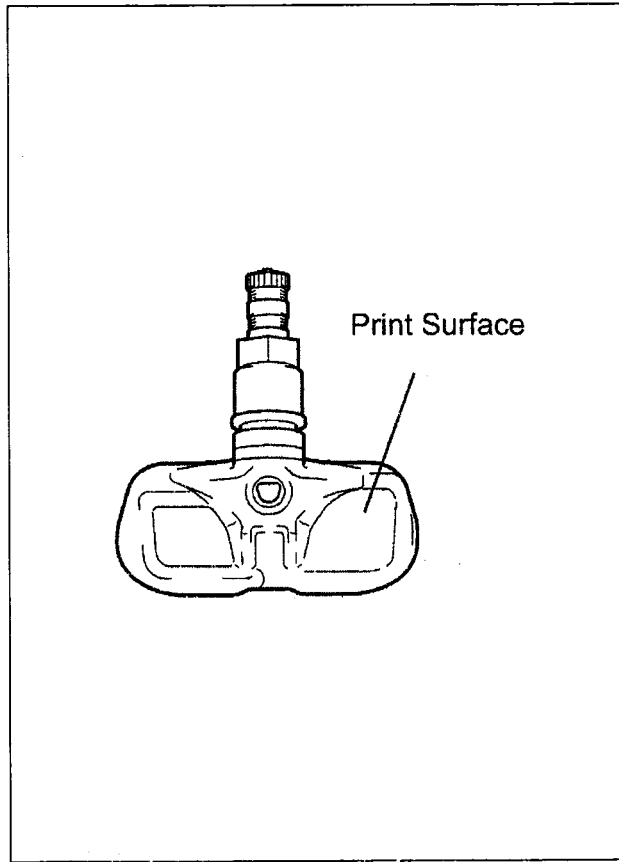

NO damage found on the tire bead(s):

- Reinstall the original tire(s).

NOTE:

Tires unnecessarily replaced may result in the claim being debited.

D. TIRE INSTALLATION

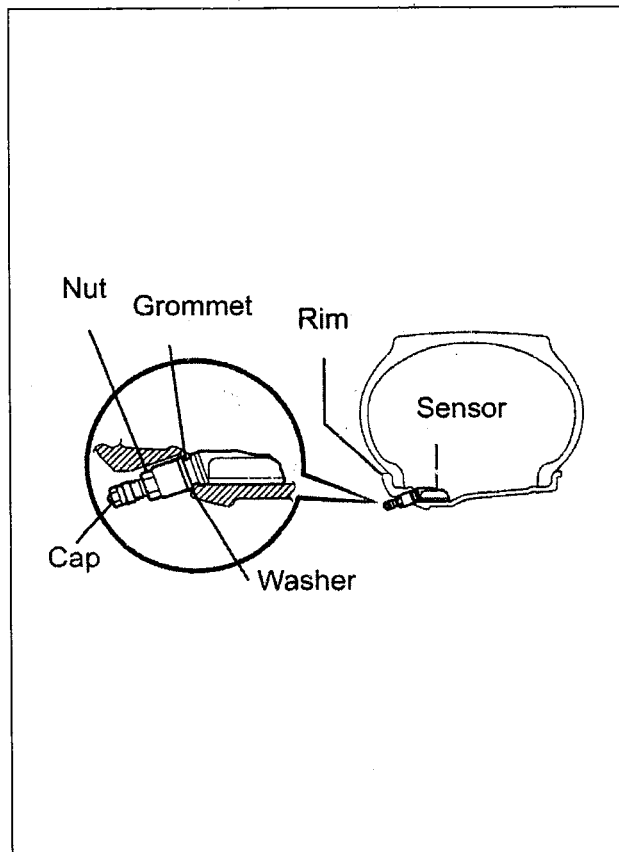

1. REINSTALL THE TIRE PRESSURE WARNING VALVE AND TRANSMITTER (VALVE SENSOR)

- a) Insert the valve sensor into the valve installation hole. Insert it from the inside of the rim so that the print surface can be seen.

NOTES:

- Check that there is no visible deformation, damage or other abnormalities on the valve sensor.
- Check that there is no foreign material on the inner grommet and around the rim hole.
- If installed in the reverse direction, the valve sensor may be damaged or fail to transmit signals when running at high speeds.

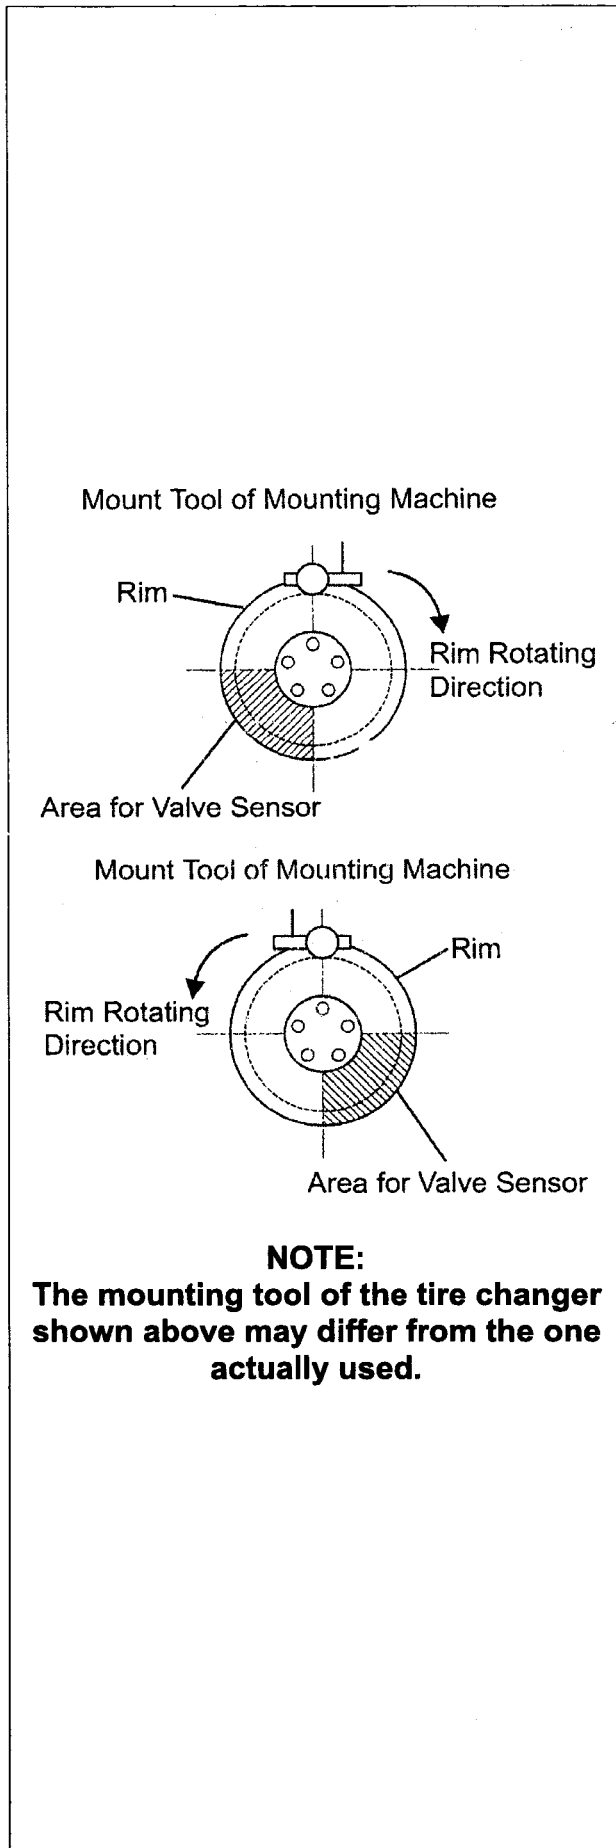

- b) Reinstall the washer onto the valve sensor from the rim side and tighten it with the nut.

Torque Specification:

4.0 N·m (41 kgf·cm, 35 in·lbf)

NOTE:

- Check that there is no foreign matter on the washer or nut.
- When the valve sensor is removed for tire replacement, check that there is no damage, cuts, and foreign material such as mud, dirt or sand attached to the grommet. Replace the grommet, as well as the washer and nut if necessary.
- Check that there is no oil, water or lubricant around the rim hole, valve sensor, washer and nut. Failure to check may result in improper installation.

- c) Position the main body of the valve sensor in the shaded area as shown in the illustration.

NOTE:

- If the valve sensor is positioned outside of the shaded area, interference with the tire bead may occur, causing possible damage to the tire and/or the valve sensor.
- Always consider the mount/dismount head as the 12 o'clock position.
- If the rotation of the wheel is clockwise, rotate the wheel until the valve sensor is at the 7 o'clock position.
- If the rotation of the wheel is counterclockwise, rotate the wheel until the valve sensor is at the 5 o'clock position.
