SUBJECT: SAFETY RECALL NHTSA RECALL #06V-337

EFFECTIVE IMMEDIATELY: A DEMONSTRATION AND DELIVERY HOLD is placed on certain 2006 and 2007 Surfside, Sea Breeze, Sea Breeze LX, Dolphin, and Dolphin LX motorhomes.

Reasons for recall

National RV, Inc. decided that certain motorhomes manufactured may not have been equipped with a static electricity grounding strap between the fuel fill neck and the chassis. The motorhomes identified could be susceptible to problems caused by static electricity, including fire, when filling the fuel tank. The installation of the ground strap will significantly decrease the potential for problems associated with inadequate grounding of the fuel fill neck.

Please Note

Federal law requires dealers to complete any outstanding safety recall service before a new vehicle is delivered to the buyer or lessee. Violation of this requirement could result in a civil penalty.

Please promptly correct affected vehicle(s) along with other eligible vehicles that are delivered to your dealership.

Dealer-Owner contact

If your dealership has sold the unit listed on the address label, immediately contact the affected owner and provide the owner a copy of this letter while scheduling a service date. Please advise me if the new owner cannot be contacted.

Sincerely,

Dan Escalera
National Owner Service Manager
