Re: Defect Information Report; Vehicles Equipped with
Certain Refrigerators Manufactured by Dometic Corporation

Dear Mr. Smith:

Universal Specialty Vehicles, Inc. has been advised by Dometic Corporation that certain Dometic refrigerators installed as original equipment in some of Universal Specialty Vehicles, Inc. recreational vehicles may contain a defect that relates to motor vehicle safety because they may experience a leak of pressurized coolant solution which can result in a vehicle fire under certain specific circumstances. On the basis of that Dometic determination, Universal Specialty Vehicles, Inc. has decided that there may be a potential safety defect in its vehicles equipped with the identified refrigerators. and we are therefore submitting the enclosed Defect Information Report pursuant to 49 CFR Part 573.

If you have any questions, please do not hesitate to contact the undersigned at (951) 943-7747 ext. 202.

Sincerely,

Charles A. Hall
President

NHTSA Recall No. 06E-076

Mr. Daniel C. Smith
Associate Administrator for Enforcement
National Highway Traffic Safety Administration
400 Seventh Street, S.W.
Washington, D.C. 20590

Dear Mr. Smith:

This letter is written to notify the NHTSA that Universal Specialty Vehicles, Inc. is aware of the voluntary initiation of a recall notification campaign affecting produced recreational vehicles as listed below:

Universal Specialty Vehicles, Inc. - Model Year 1997-2003

Eagle Manufactured 4-01-97 through 7-01-03

The Vehicles covered by this report are recreational vehicles that were equipped with certain models of reffigerators manufactured by **Dometic** Corporation between April 1997 and May 2003.

This voluntary recall campaign is being conducted by:

Dometic Corporation and Stericycle Incorporated.

This voluntary recall campaign involves approximately 18 Universal Specialty Vehicles, Inc. class A motor homes manufactured with **Dometic** Corporation refrigerators. Based on information received from **Dometic**, the approximate percentage of vehicles estimated to actually contain the defect is .06 percent.

The reason for the recall is that under some circumstances, a fatigue crack can develop in the boiler tube of the covered refrigerator, which can permit the release of pressurized coolant solution. If this solution is exposed to an ignition source under certain specific circumstances, it can result in a vehicle fire.

Dometic advised Universal Specialty Vehicles, Inc. of its defect determination by letter received February 19, 2007. Universal Specialty Vehicles, Inc. is not aware of any fires in its vehicles that appear to be related to this defect. Nevertheless, after reviewing the matter, Universal Specialty Vehicles, Inc. decided to submit this defect report.

Dometic has arranged to conduct a recall to remedy the potential defect in Universal Specialty Vehicles, Inc. vehicles at no charge to vehicle owners. See Recall NO. 06E-076. Pursuant to 49 CFR 573.6(c)(8)(i) and 573.13, owners will be advised that **Dometic** will reimburse them if they have incurred costs to obtain a remedy for a reffigerator containing such a defect prior to their receipt of the notification.

Sincerely,

Charles A. Hall
President
Universal Specialty Vehicles, Inc.
