Dear Mr. Person:

2008 Fuzion Fifth Wheels Production Dates: 4/27/2007 – 6/15/2007 VIN Range: 4YDF373298F810000 - 4YDF362308F810245	246

- B. Description of Defect. The vehicles subject to this recall campaign may have incorrect wiring to the water heater. If the wiring is incorrect, the gas valve on the water heater could open and allow LP gas into the burner tube when the electric switch is turned on. This will cause an increased risk of fire, explosion, and personal injury.

- C. Basis for Determining that a Defect Exists. The defect was discovered during a review of warranty claims. All Fuzion vehicles manufactured up until the problem was discovered are included in the recall.
- D. Remedying of Defect. The remedy is to have the dealers inspect the wiring and make corrections if necessary.
- E. Owner Notifications. Keystone will notify the owners of the recreational vehicles by letter beginning on August 2, 2007 pending NHTSA approval. A final copy of the owner letter will also be provided to NHTSA, along with the dealer repair procedures.
- F. Quarterly Reporting Requirements. Keystone will be filing quarterly reports in connection with this recall campaign.
- G. Campaign Number. Keystone's identification code for this recall is 07-088.
