

GENERAL MOTORS CORPORATION
Vehicle Structure & Safety Integration

January 30, 2008

Mr. Daniel C. Smith
Associate Administrator for Enforcement
National Highway Traffic Safety Administration
Recall Management Division (NVS-215)
1200 New Jersey Avenue, SE – Room W45-306
Washington, D.C. 20590

Dear Mr. Smith:

The following information is an update of the 573.6(c)(2)(3)(4)(6) information in our October 3, 2007 letter as it relates to a decision by General Motors to recall certain 2007 model year Cadillac CTS vehicles for sunroof operation. This information is submitted pursuant to the requirements of 49 CFR 573.6. GM has not notified dealers and owners of this recall due to part availability.

GM is amending its October 3, 2007 letter to include certain 2007 model year Buick Lucerne vehicles.

On October 9, 2007, GM was notified by a company car driver of a 2007 model year Lucerne that exhibited a condition where the sunroof could be closed after the ignition was turned off and the doors were opened. An investigation began to understand the issue.

The investigation of the Lucerne condition resulted in an understanding of the root cause of the condition on the Lucerne, and to additional root causes of the condition on the CTS. The determination was made to add certain 2007 model year Buick Lucerne vehicles to the recall.

The addition of the Lucerne and identification of additional CTS root causes required changes to the original design of the jumper harness for this recall.

573.6(c)(9): General Motors will provide the dealer bulletin and owner letter when available. Based on expected parts availability, GM anticipates sending the dealer bulletin and owner letters in May 2008.

If you have any questions regarding this revision to GM's October 3, 2007 letter please call.

Sincerely,

Gay P. Kent

Director
