Airtex has determined that there is a potential product safety related issue involving the **E7081H** fuel pump module.

The potential issue is the result of an out-of-tolerance component from an outside supplier.

No occurrences have been reported in the field. To avoid any potential issues it is necessary that you and your customers **contain and return all E7081H fuel pump modules marked with the below listed Manufacturing Date Codes.**

Fuel pump modules installed during the time period May 7, 2007 thru July 19, 2007 are also affected and must be returned. It is important that you provide us with the names and addresses of all customers who may have purchased or installed the affected fuel pump modules. Details and action to be taken for units installed on vehicles will follow.

You may respond to Airtex via mail, fax or email:
