

Mack Trucks, Inc.

Safety Recall ALERT

Date: March 13, 2007 **Number:** SRA-533-004
To: All U.S. & Canadian Distributors
Attention: Service Manager, Warranty Manager, Parts Manager, Dealer Principal
From: Regulatory Affairs Department
Subject: Safety Recall, SC0321, Brake Pedal Cotter Pin

Safety Recall Summary:

On certain Mack CTP and GU model vehicles manufactured from June 28, 2005 through January 31, 2007, the cotter pin that retains the brake pedal clevis pin may not have been installed. The clevis pin connects the brake pedal to the brake foot valve; therefore, if the pin were to come loose, the driver would not be able to apply the service brakes.

The number of vehicles affected is approximately 3,587 (3,391 US and 196 Canada).

Dealer's Responsibility:

The National Traffic and Motor Vehicle Safety Act and Canadian Motor Vehicle Safety Act requires dealers to ensure that all new and used vehicles are free of safety defects and comply with all relevant safety standards at the time of delivery to the consumer.

Dealers should make their personnel aware of the safety recall. In the event that a dealer has a vehicle included in the safety recall in their inventory to be sold, the condition must be corrected before releasing it to a customer.

Release Schedule:

- Repair Instructions are tentatively scheduled for release no later than March 16, 2007.
- Vehicle list will be posted on the Trucks Dealer Portal March 13, 2007.
- Owner Notices are scheduled to be mailed on or before March 26, 2007.

Questions:

Contact the Regulatory Affairs Department at vtna.regulatoryaffairs@volvo.com if you have questions.
