DCS1820
URGENT - DISTRIBUTE IMMEDIATELY

Date: July 24, 2007

Subject: 07154B - Noncompliance Recall
Windshield/Liftgate Glass/Side Stationary Glass Retention
Vehicle Inspection Update

Models: 2007 Chevrolet Equinox
2007 Pontiac Torrent

To: All Chevrolet and Pontiac Dealers

Attention: Sales Manager and Service Manager

This message provides an update regarding the status of those vehicles involved in recall 07154B that were returned to General Motors for a special glass inspection.

Inspectors from the assembly plant visited the final GM Vehicle Distribution Center and completed the last remaining inspections on Friday, July 20th. With the exception of some recently inspected units, all involved vehicles have been returned or, are in the process of being returned, to their respective dealers. We anticipate that all outstanding units should be returned within the next 7 to 10 days.

Each vehicle is being returned with a completed Inspection/Repair Worksheet in the vehicle. This document indicates if the vehicle passed or failed the inspection. Vehicles that passed require no further action and can be immediately released for sale/delivery. Vehicles that failed will require dealer replacement of the specific fixed glass noted on the worksheet. Once the discrepant glass is replaced, the vehicle can be released for sale/delivery. To help ensure that only the discrepant glass is replaced, the inspectors will also mark each "bad" piece of glass with a large "X" using a yellow grease marker.

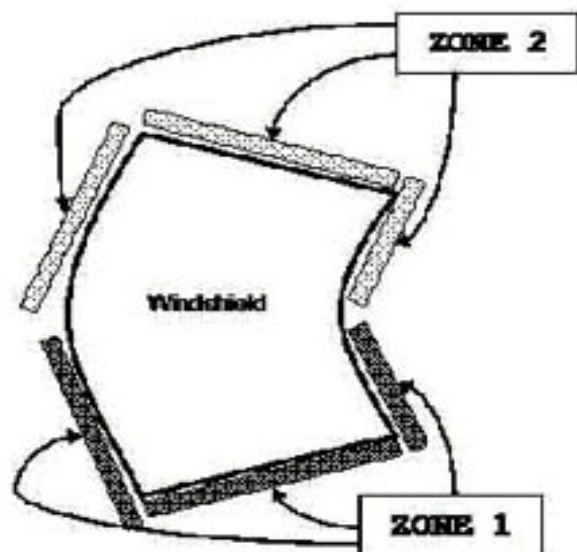

Additionally, the attached file contains most of the inspection results for the involved vehicles originally identified in the "US Vehicles Returned to GM" file sent to dealers with the recall bulletin on June 14, 2007. These results are sorted by the three glass installation zones utilized at the assembly plant. See the "How to Read" tab for further clarification.

Please see bulletin 07154B for more information about this recall.
