

## NEW DIAGNOSTIC SOFTWARE VERSION 2007-2

Tune software version **2007\_2** is now available to download and update your Triumph diagnostic handsets. This supersedes the previous issue 2007\_01. The software and instruction files [EDreadm](#) and [ENdownload](#) will be stored in the [Diagnostic Software](#) section of Service/Technical.

### **PLEASE ENSURE ALL RELEVANT STAFF ARE INFORMED OF THIS INFORMATION**

(remember to update those returning from holidays/absence)

#### **Update Details**

- Street Triple – New Calibrations
- Rocket III, Rocket III Classic – Improved Idle Stability
- Tiger 1050 – Improved Low Fuel Level Reading (Fuel Gauge)
- Daytona 675 - New ECU

**Tune Access Password remains unchanged:** 18436572 (Also on page 1 of ENdownload Tune Download Instructions)

#### **Unlock codes:**

Tiger 1050 **57685544**

Daytona 675 **54634526**

Sprint/Speed Triple 1050i **45464744**

Street Triple **33844055**

#### **Incorrect Unlock Code?**

In the unlikely event that an incorrect UNLOCK code is entered on three consecutive occasions, the ECU will enter the 'Tamper Detected' mode. The software must then be re-downloaded in order to allow further attempts to unlock the ECU.

Once the correct calibration software has been re-downloaded, carry out the ECU unlock procedure.

Ensure the motorcycle has had a full PDI and the engine is filled with oil before attempting to start the motorcycle.

**Patch (USB-Serial)**

You may note a file in the Diagnostic Software section "Patch(USB-Serial)". This patch may help users of Windows XP(SP2) experiencing difficulties when connecting to the diagnostic handset using a USB-Serial adapter lead.
