NOTICE OF SAFETY RECALL

January 17, 2007

Dear Toyota Customer:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Rostra Precision Controls Company, Inc. ("Rostra"), a supplier of speed controls to Gulf States Toyota, Inc. ("GST"), has determined that a defect relating to motor vehicle safety exists on certain 2006 and 2007 model year Scion Xa and Scion Xb vehicles equipped with a GST- installed Rostra speed control and

- installed at GST's Vehicle Processing Center between: September 1, 2006 and January 17, 2007, or
- installed by Toyota dealers in the GST region (Arkansas, Louisiana, Mississippi, Oklahoma and Texas) between: September 1, 2006 and January 17, 2007.

What is the problem?

Certain speed control units have a faulty module. The problem is that when the speed control "On/Off" switch is pressed once to turn the unit off, the throttle does not return to idle. When the "On/Off" switch is pressed a second time, the throttle will return to idle.

An accident could result in the event that the cruise control does not allow the engine to return to idle on the first depression of the "On/Off" switch.

The vehicle's brakes will bring the vehicle to a stop. There may be an amount of additional brake pedal force to be used if this condition occurs.

What can you do to help ensure that this problem does not occur?

Please refrain from using your speed control while driving until your vehicle is inspected/repared at a servicing Toyota dealer.

What will GST do?

Any Toyota dealer in GST's region (Arkansas, Louisiana, Mississippi, Oklahoma and Texas) will inspect and/or replace the speed control module if it is defective at no charge to you. This will include a thorough test drive of the vehicle using the speed control after the inspection and/or speed control module replacement.

What should you do?

Contact any Toyota dealer in GST's region and make an appointment to have your vehicle inspected and/or the speed control module replaced. Although the estimated time to complete this repair is approximately 1 hour, please be advised that this repair may take longer depending on the work schedule and load of the service department.

Please present this notice to the dealer when the vehicle is brought in for repair.

If you are not in GST's region (Arkansas, Louisiana, Mississippi, Oklahoma, Texas), please contact GST's Customer Assistance Center 1-800-444-1074 for repair procedures. If you no longer own the vehicle, please indicate so using the enclosed postage-paid form and if possible, provide us with the name and address of the new owner.

What if you have other questions?

If you are within the continental United States, you may contact GST's Customer Assistance Center at 1-800-444-1074.

If you are not within the continental United States, you may contact GST's Customer Assistance Center at 1-713-580-3465.

If you believe that the dealer or Toyota has failed or is unable to remedy the defect within a reasonable time, you may submit a complaint to the Administrator, National Highway Traffic Safety Administration, 400 Seventh Street S.W., Washington, D.C. 20590, or call the toll free Auto Safety Hotline at 1-888-327-4236 (TTY: 1-800-424-9153), or go to <http://www.safercar.gov>.

If you are a vehicle lessor, Federal law requires that any vehicle lessor receiving this recall notice must forward a copy of this notice to the lessee within ten days.

Sincerely,

Gulf States Toyota
