What the safety concern is:

This non-compliance relates to failure to install the vehicle Tire and Load Label, as required by Federal Motor Vehicle Safety standard No. 110 "*Tire Selection and Rims*". Specifically, certain vehicles were sold that did not include the proper Tire and Load Label. With out this information, it would be possible to overload the vehicle, which could affect vehicle handling and occupant or pedestrian safety. In the event of a crash due to this noncompliance vehicle passengers and or pedestrians could experience severe injury or mortality.

There is no readily visible distinction between a compliant and a non-compliant vehicle and no warning, which indicates non-compliance, exist.
