

**RE: Safety Recall Action J003 – Inspection and Repair Brake Servo Vacuum Hose
Vehicles Affected: 2007 XKR (Supercharged)**

Dear Jaguar Owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Jaguar has decided that a defect, relating to motor vehicle safety, exists in some 2007 model year XKR supercharged vehicles. These vehicles may have the brake servo vacuum supply hose routed incorrectly. Your vehicle is included in this recall action.

What is the concern?

Affected vehicles may have the brake servo vacuum supply hose incorrectly routed. The incorrect routing can cause that hose to rest against the Exhaust Gas Recirculation (EGR) valve, resulting in potential damage to the hose and a possible vacuum leak. A vacuum leak could increase the brake pedal effort required to stop the vehicle, possibly increasing stopping distance, and could result in the vehicle being involved in a crash.

What will Jaguar and your Jaguar Dealer do?

An authorized Jaguar Dealer will inspect the brake servo vacuum hose and reroute or replace the hose where necessary free of charge.

What should you do?

Please contact your authorized Jaguar Dealer at your earliest convenience to schedule an appointment to have Recall Action J003 completed on your vehicle.

How long will it take?

Repair time is estimated to be less than an hour to inspect/reroute the vacuum hose and if necessary to install a replacement component. Because of dealer scheduling requirements, your vehicle may be needed for a longer period of time.

Attention Leasing Agencies:

Federal regulations require that you forward this recall notification to the lessee within TEN days.

Moved or no longer own a Jaguar?

If you are no longer the owner of this vehicle, Jaguar would greatly appreciate the name and address of the new owner, using the enclosed return postage-paid card.
