SAFETY RECALL 07509

JULY 2007

Dear International Customer,

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

International® has decided that a defect which relates to motor vehicle safety exists in the brakes of the rear-rear axle of certain 7400 and 7500 models built 10/11/2004 thru 2/22/2007 with feature codes 004WDW – Asphalt Spreader Brake Chamber Relocation and either 0014GJD – Dana Spicer DST41/RST41 Rear Tandem Axle OR 0014GJE – Dana Spicer DST41P/RST41 Rear Tandem Axle.

REASON FOR THIS RECALL

The rear-rear axle brake slack adjusters may contact the rear axle housing preventing the brakes from being fully applied, possibly causing extended stopping distances.

RISK TO MOTOR VEHICLE SAFETY

Extended stopping distances can contribute to a vehicle crash that may result in property damage, personal injury or death.

ACTIONS YOU SHOULD TAKE

PLEASE contact your local International dealer to schedule an appointment to have your vehicle repaired. You may locate your nearest International dealer by calling 1-800-44-TRUCK or by visiting:

The repair will involve replacing the rear-rear axle brake spiders, which will re-clock the foundation brakes and provide proper slack adjuster operational clearance.

Dealers will have parts and instructions to repair your vehicle by 6/29/2007.

This will be performed *free of charge* and may take approximately *3 hours* to complete.
