

OWNER'S LETTER

Dear Nissan Owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Nissan has decided that a defect that relates to motor vehicle safety exists in some 2007 model year Nissan Quest vehicles. Our records indicate that you own or lease the Nissan vehicle identified by the VIN on the cover of this notice.

Reason for Recall

During production, a select number of the Quest vehicles underwent an offline inspection at the assembly plant where a bolt in the front suspension assembly was removed. On some vehicles subject to the offline inspection, it is possible that this bolt may not have been tightened to specification when it was reinstalled. If the bolt is loose, the driver will hear a rattling noise and notice vibration. If the bolt comes off completely, the driver can experience difficulty in controlling the direction of the vehicle which could result in a crash.

What Nissan Will Do

Your Nissan dealer will replace the attachment bolts and tighten them to the specified value. This free service should take about 1 hour to complete, but your Nissan dealer may require your vehicle for a longer period of time based upon their work schedule.

What You Should Do

Contact your Nissan dealer at your earliest convenience in order to arrange an appointment to have your vehicle repaired.

Please bring this notice with you when you keep your service appointment. Instructions have been sent to your Nissan dealer.

NOTE:

If you hear a rattling noise and notice any vibration you should take your car to a Nissan dealer for repair as soon as possible. If this situation should occur you may have difficulty steering the vehicle, and we therefore strongly advise that the vehicle be towed to the dealer for repair.

If you have additional questions you may contact the National Consumer Affairs Department, Nissan North America, Inc., P.O. Box 685003, Franklin, TN 37068-5003.
