2007 Tacoma 4WD Rear Propeller Shaft
SAFETY RECALL NOTICE**

Dear Toyota Customer:

This notice is being sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Toyota has decided that a defect, which relates to motor vehicle safety, exists in the Rear Propeller Shaft of certain 2007 Tacoma 4WD vehicles.

What is the problem?

A section of the Rear Propeller Shaft on certain 2007 Model Year Tacoma 4WD vehicles may have been improperly cast. In the worst case, the front side of the Rear Propeller Shaft will separate at the joint and come into contact with the road surface and result in a loss of vehicle control, thus increasing the possibility of a crash.

What will Toyota do?

Any Toyota dealer will replace the Rear Propeller Shaft with a new one at **NO CHARGE** to you.

What should you do?

This is an important Safety Recall

Please contact your authorized Toyota dealer to make an appointment to replace the Rear Propeller Shaft as soon as possible. The replacement will take approximately one hour. However, depending upon the dealer's work schedule, it may be necessary to make your vehicle available for a longer period of time.

We request that you present this notice to the dealer at the time of your service appointment.

If you no longer own the vehicle, please indicate so on the enclosed postage-paid form, providing us with the name and address of the new owner.
