Subject: DAVCO Fuel-Water Separator Preheater Thermoswitches

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. This notice is also sent in accordance with the Canadian Motor Vehicles Safety Act.

Freightliner LLC, on behalf of its Freightliner Trucks Division and its wholly owned subsidiaries, Sterling Truck Corporation and Freightliner Custom Chassis Corporation, is initiating Campaign FL508A to modify specific Freightliner Columbia, Coronado, FLD, and Century Class S/T vehicles; Freightliner Custom Chassis MT55 vehicles; Sterling A/L-line vehicles; and Western Star 4900 vehicles manufactured between December 7, 2006, and March 22, 2007.

Certain preheater thermoswitches may contain a defect that prevents the fuel preheater from turning off if the ignition is left on. When the key is in the 'ON' position, the pre-heater, located in the fuel filter base, is energized. If this pre-heater is energized while maintenance is being performed on the fuel filter, diesel fuel could ignite within the filter housing. A fire within the fuel filter housing may spread possibly resulting in property damage or personal injury.

The preheater thermoswitches will be inspected and replaced if necessary.
