DEFECT NOTIFICATION

Dear Customer:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act of U.S.A.

Prevost Car Inc. has decided that a defect which relates to motor vehicle safety exists in certain 2006 - 2007 H3-41 & H3-45 coaches, VIP motorhomes, XLII-45 motorhomes and Entertainers and X3-45 coaches.

Bendix Commercial Vehicle Systems LLC has determined that a manufacturing defect exists in the internal rubber check valves inside the SR-7 spring brake modulating valves manufactured between November 4, 2005 and April 17, 2007. The component supplier of the internal check valve made unauthorized changes to its manufacturing process leading to the internal check valve rubber becoming deformed over time and potentially resulting in the check valve not properly seating. This condition can occur intermittently. The resulting leakage can cause a delay in the application of the spring brakes to park the vehicle after the operator pulls the parking brake control valve. The delayed parking brake application can occur without warning, leading to unintended vehicle rollaway. Normal service braking isn't affected by this condition.
