November 5, 2007

Dear Victory Owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. The Victory Motorcycle Division of Polaris Industries Inc. has decided that a defect which relates to motor vehicle safety exists in some model year 2008 Victory Vision motorcycles. Our records indicate that you have purchased a potentially affected vehicle.

The reason for this recall:

Victory has decided that a defect may exist in the regulator / rectifier assembly which may cause an overcharging condition. An overcharging situation in conjunction with a loose battery cable connection could cause the engine to stall. An unexpected loss of engine power increases the risk of a loss of control and a vehicle crash.

What Victory and your dealer will do:

Victory has issued *Safety Recall Bulletin V-07-01* to all Victory dealers, with instructions to replace the voltage regulator / rectifier and verify both battery cables are properly tightened on all affected vehicles. Repairs will be made by any authorized Victory motorcycle dealer at no cost to you. The actual repair will take approximately 30 minutes to perform; however, it may take longer due to service scheduling requirements.

What you should do:

Please call your authorized Victory motorcycle dealer to schedule an appointment to have the bulletin repair performed.
