

## **OWNER'S LETTER**

Dear Nissan owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Nissan has decided that a defect which relates to motor vehicle safety exists in some 2007 and 2008 model year Nissan Altima vehicles. Our records indicate that you own the Nissan vehicle identified by the Vehicle Identification Number on the cover of this notice.

### **Reason for Recall**

The vehicles affected by this campaign had the Body Control Module (BCM) replaced during service at a Nissan dealership after October 1, 2007 and before November 30, 2007. During that service, the Tire Pressure Monitoring System (TPMS) may have been inadvertently deactivated due to an issue with the dealer service software. Our records indicate that the BCM in your vehicle was replaced during this time period.

If the TPMS is turned off, it would not alert the driver to a decrease in the tire pressure as designed. Driving on under-inflated tires is unsafe and could result in a crash.

### **What Nissan Will Do**

In order to correct this issue, your Nissan dealer will check the TPMS function in your vehicle, and reactivate it if necessary. This free service should take about one hour to complete, but your Nissan dealer may require your vehicle for a longer period of time based upon their work schedule, or parts availability.

### **What You Should Do**
