**In RE: 2nd Quarterly Report for Fuel Pump Module Recall 07E-015**

Dear Mr. Smith:

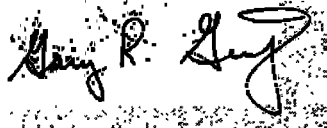

Per section 573.7, the required information is listed below.

1. The notification campaign number is 07E-015.
2. Delphi notified dealers/distributors on March 20<sup>th</sup>. Delphi will mail owner notification letters if owner contact information becomes available (via dealers/distributors).
3. The number of fuel pump modules being recalled is 3124.
4. Two vehicles have been inspected and one vehicle required a fuel pump module replacement.
5. Delphi estimates that 18 remaining suspect fuel pump modules of the 3124 shipped population are unreachable for inspection and replacement due to the following reasons:
  - Owner contact information is not available.
  - Non-conforming fuel pump modules were detected shortly after installation and were replaced (and scrapped) without Delphi being aware.
6. Delphi has inspected 2428 fuel pump modules in dealer/distributor stock and has the following breakdown:
  - 115 parts were found to be non-conforming and were replaced.
  - 2313 parts were found to be conforming and did not require replacement.
    - 29 of the 2313 were from the suspect tube bundle date code but were found to be conforming and did not require replacement.
  - Note that all inventory found is inspected regardless of the ship date.

Letter to Daniel Smith
