In RE: 2nd Quarterly Report for Fuel Pressure Regulator / Universal Pressure Regulator (UPR) Recall 07E-021

Dear Mr. Smith:

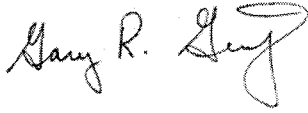

Per section 573.7, the required information is listed below.

1. The notification campaign number is 07E-021.
2. Delphi notified dealers/distributors on April 23rd. Delphi will mail owner notification letters if owner contact information becomes available (via dealers/distributors).
3. The number of UPRs being recalled is 742.
4. One vehicle has been inspected and it did not require UPR replacement.
5. Delphi estimates that 299 remaining suspect UPRs of the 742 shipped population are unreachable for inspection and replacement due to the following reasons:
 - Owner contact information is not available.
 - Non-conforming UPRs were detected shortly after installation and were replaced (and scrapped) without Delphi being aware.
6. Delphi has inspected 641 UPRs in dealer/distributor stock and has the following breakdown:
 - 41 parts were found to be from the suspect population and were replaced.

Letter to Daniel Smith
