RE: Part 573-6 Quarterly Report, Q1  
Recall No.: 07E-098  
Moss Motors, Ltd., Recall of Reproduction Radiator Cooling Fan

Dear Ms. Schuler:

Enclosed, please find a Part 573 Defect and Noncompliance Quarterly Report for the above parts. This Report covers the first quarterly period of this recall.

As you know, this part is a reproduction radiator cooling fan used on the above models of vintage 1956 to 1967 Austin-Healey automobiles, Models BN4, BN6, BN7, BT7, BJ7, and BJ8. The fans are exact duplicates of the original design, used in the restoration of these automobiles.

Briefly, Moss Motors imported 320 of these parts between October 2005 and September 2007, all from one vendor. Moss Motors was notified of only one failure, in September 2007, and thereupon ceased sales of the part. A total of 184 parts were sold to 126 different customers. All customers have been sent Notification letters (twice) regarding the recall, and have also been sent email notification. The Recall Notice is also posted on the company's website. Responses have been received from roughly half of those customers so far.

To date, 34 fans have been returned, and along with those removed from inventory, a total of 208 have been scrapped. All the parts subject to the recall will be scrapped and replaced with an alternate design; none will be re-worked or modified.

Thank you again for your assistance in helping us with this recall.

Best Regards,

J. Stuart Duncan, Esq.

encl.
