PART 573 Defect and Noncompliance Report

On January 25, 2008, Crane Carrier Company (manufacturer) decided that a non-compliance with 49 CFR Part 571.121 exists in certain motor vehicles, and is furnishing notification to the National Highway Traffic Safety Administration in accordance with 49 CFR, Part 573.6, Defect and noncompliance information report.

Date this report was prepared: February 25, 2008

Manufacturer: Crane Carrier Company
1925 N. Sheridan Rd.
Tulsa, OK 74158

Contact: Jeffrey L. Carpenter
Director of Service
Phone: (918) 832-7305
Fax: (918) 832-7333

Report prepared by: Jeffrey L. Carpenter

CRANE CARRIER COMPANY

The Refuse Vehicle Specialists

I. Identify the Vehicle Model Involved in the Recall

2. Vehicles involved in the recall:

Make: Crane Carrier

Model years involved: 1998 Thru 2007

Models: COE, LDT, LDT2, LET, LET2

Production Dates: Beginning: 3/17/1998

Ending: 12/18/2007

VIN Range: 1CYCAA38XWT043459 Thru 1CYCAK4808T048399

Vehicle Type: Cab and Chassis

Body style: Refuse

II. Identify the Recall Population

3. The total number of vehicles recalled potentially containing the noncompliance by model year.

LET	1998	56
LET	1999	74
LDT	1999	5
COE	1999	12
LET	2000	89
LDT	2000	1
COE	2000	10
LET	2001	48
LET2	2001	14
COE	2001	6
LDT	2001	1
LDT2	2001	12
LET	2002	3
LET2	2002	12
LDT2	2002	7
LDT	2002	2
LET	2003	1
LET2	2003	35
LDT2	2003	4
LET2	2004	62
LDT2	2004	8
LET2	2005	34
LDT2	2005	5
LET2	2006	41
LDT2	2006	12
LET2	2007	94
LDT2	2007	24

Total number potentially affected by the recall: 672

4. The percentage of vehicles recalled estimated to actually contain the noncompliance is 100%.

The recall population was identified by computer search of all cab and chassis' with air piping assembly groups determined by testing to be outside 49 CFR Part 571.121 compliance standards. This search identified all cab and chassis' with a 2 axle configuration built from 1998, the year this air piping configuration was designed and implemented to present.

III. Describe the Noncompliance

5. Description of the Noncompliance: The Noncompliance relates to brake release timing as specified in Title 49 CFR Part 571.121 Section S5.3.4.1. The remedy instructions will specify exact fittings and hoses with locations that will be replaced to bring the vehicles into compliance. These instructions will be supplied to NHTSA as part of the recall communications.

Description of the cause of the Noncompliance: The noncompliance occurred as a result of the unit configuration instrumented for the initial testing. The original unit was a three axle that was modified to the air piping configuration of a two axle for testing. However, the three axle configuration had smaller air capacity brake chambers on the front axle which was overlooked at that time. Recent compliance testing revealed this discrepancy.

Description of the consequences of the Noncompliance: The consequence is slow brake release timing. Timing was tested at .75 seconds and the requirement is .55 seconds.

IV. Chronology in Determining the Noncompliance

7. On January 23-24, 2008 a Regional Service Engineer representing Bendix Commercial Vehicle Systems LLC conducted brake system performance testing in conjunction with Crane Carrier Engineering Department on several chassis configurations. On January 25, 2008 I was notified by my engineering department that testing had concluded and the results were forwarded to me. The testing revealed brake release timing discrepancies that were corrected through various fitting and hose changes within the air brake system, bringing the system into compliance. Copies of the initial and post modification test results are attached.

V. Identify the Remedy

8. Description of Manufacturer's remedy for the Noncompliance: The remedy involves replacement of several fittings and hoses which increase air flow and subsequently improve brake release timing. Specific information is included as rework instructions.

Crane Carrier will work with our dealer organization and vehicle owners to identify a repair facility to perform the modification. We will then work with these facilities to assure the modification is properly accomplished in a timely manner. Parts and instructions will be shipped at no charge. Labor will be reimbursed at the individual hourly rate of the repair facility by invoice or letter. Crane Carrier Warranty Service Centers will be reimbursed by warranty claim.

Production Correction: On 1/25/08 Crane Carrier Engineering Dept. developed and implemented necessary manufacturing changes in the air brake piping. These changes have been incorporated as the field remedy for this recall.

CRANE CARRIER COMPANY

The Refuse Vehicle Specialists

VI. Identify the Recall Schedule

All Vehicles Identification Numbers involved in the recall were identified on 1/8/08.

Dealer notification began the of week 2/11/08.

Owner notification will begin upon approval of the attached draft Owner Notification Letter

Remedy Instructions and parts will be ready to begin shipping the week of 2/18/2008.

VII. Furnish Recall Communications

Please find attached copies of all recall communications as well as test results.

Please find attached draft copy of the Owner Notification Letter.

DEALER NOTIFICATION OF IMPORTANT RECALL INFORMATION

This is to inform you of the start of a voluntary safety recall campaign involving Crane Carrier vehicles.

NHTSA has assigned recall number 08V-049.

Impacted Product:

The products subject to recall are two (2) axle refuse cab and chassis manufactured between 1998 and 2007, inclusive.

Problem Description:

Crane Carrier has determined that certain 1998 thru 2007, two (2) axle refuse cab and chassis' fail to conform to Federal Motor Vehicle Safety Standard No. 121; Air Brake Systems. These vehicles were built with air brake systems that will not meet current standard S5.3.4 for brake release timing where tested timing was slower then required. These vehicles will experience a fractional second delay in brake release.

The slow release timing should be imperceptible to the driver and no specific precautions are required. Risk to motor vehicle safety caused by the noncompliance is minimal.

Cause of the Noncompliance:

The noncompliance occurred as a result of the unit configuration instrumented for the initial testing. The original unit was a three axle that was modified to the air piping configuration of a two axle for testing. However, the three axle configuration had smaller air capacity brake chambers on the front axle which was overlooked at that time. Recent compliance testing revealed this discrepancy.

What We Will Do:

Crane Carrier will provide replacement fittings and hoses at no cost along with installation instructions. We will reimburse repair facilities one (1) hour labor per vehicle to make the modification. Actual time required is approximately 30 to 45 minutes. We will assist in coordinating the modification with your facility or another customer preferred facility. Parts and installation instructions are currently available.

What You Should Do:

First and Foremost, you should immediately stop delivering any new vehicles involved in this recall to customers until the remedy has been performed.

Request for remedy part kits and/or labor reimbursement should be made to: Director of Service, Crane Carrier Co., Fax No. (918) 832-7333.

We value our business relationship with you, and we appreciate your understanding and cooperation in this matter. If you have any questions, please do not hesitate to contact me at (918) 832-7305 or by e-mail at jcarpenter@cranecarrier.com.

Sincerely

Jeffrey L. Carpenter
Director of Service

VEHICLE DEFECT OWNER NOTIFICATION

Recall No. 08V-049

Dear Crane Carrier Vehicle Owner;

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

REASON FOR THIS RECALL

Crane Carrier has decided that certain 1998 thru 2007, two (2) axle refuse cab and chassis' fail to conform to Federal Motor Vehicle Safety Standard No. 121; Air Brake Systems.

These vehicles were built with air brake systems that will not meet current standard S5.3.4 for brake release timing where tested timing was slower then required. These vehicles will experience a fractional second delay in brake release.

The slow release timing should be imperceptible to the driver and no specific precautions are required. Risk to motor vehicle safety caused by the noncompliance is minimal.

WHAT YOU SHOULD DO

Crane Carrier urges you to contact your nearest authorized Crane Carrier Dealer, or the Crane Carrier Service Department at (918) 832-7305. We will assist in coordinating the modification with your repair facility or one of the Crane Carrier Warranty Service Centers throughout the United States.

The remedy will be performed without charge and requires the replacement of select fittings and hoses in the air brake system. Crane Carrier will supply at no charge all necessary parts and installation instructions. The labor time necessary to perform this service correction is less than one (1) hour per vehicle. Reimbursement of one (1) hour labor per vehicle at the repair facility's posted labor rate may be obtained by filing a warranty claim (authorized Warranty Service Centers) or by letterhead invoice (all other facilities).

Request for remedy part kits and/or labor reimbursement should be sent to: Director of Service, Crane Carrier Co., P.O. Box 582891, Tulsa, OK, 74158. Parts and instructions are currently available for shipping. If you should have any questions concerning this recall notice you may contact the Crane Carrier Company Service Department at (918) 832-7305. Federal Regulation requires that any vehicle lessor receiving this recall notice must forward a copy of this notice to the lessee within ten days.

After contacting the Crane Carrier Company Service Department, if you are still not able to have the safety defect remedied without charge and within a reasonable time, you may submit a complaint to the Administrator, National Highway Traffic Safety Administration, 1200 New Jersey Ave., SE, Washington DC 20590; or call the toll-free Vehicle Safety Hotline at 1-888-327-4236 (TTY: 1-800-424-9153); or go to <http://www.safercar.gov>.

CRANE CARRIER COMPANY

The Refuse Vehicle Specialists

We apologize for this inconvenience; however, we have taken this action in the interest of public safety and continued satisfaction with our products. If you have sold or traded the affected vehicle, please let us know by either fax at (918) 832-7333 or by e-mail at service@cranecarrier.com. If you had this repair performed before you received this letter, you may be eligible to receive reimbursement for the cost of obtaining a pre-notification remedy of the problem associated with this recall. For more information contact Crane Carrier Company Service Department, P.O. Box 582891, Tulsa, OK 74158, by phone at (918) 832-7305, or by e-mail at service@cranecarrier.com.

Sincerely

Jeffrey L. Carpenter

CRANE CARRIER CO

2 Axle Refuse Chassis Air Brake Modification Instructions

Tool Requirements: Basic hand tools

Technical requirements: Basic mechanical knowledge.

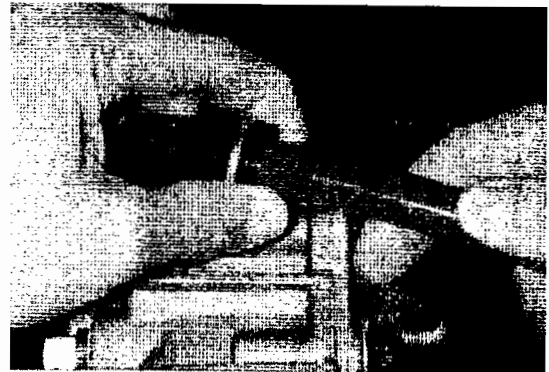

Rework Kit Contents:

- (2) 45 degree - 5/8" Tubing X 3/8" NPT fitting*
- (1) 26" Red 5/8" Tubing*
- (12) Tie Wraps*

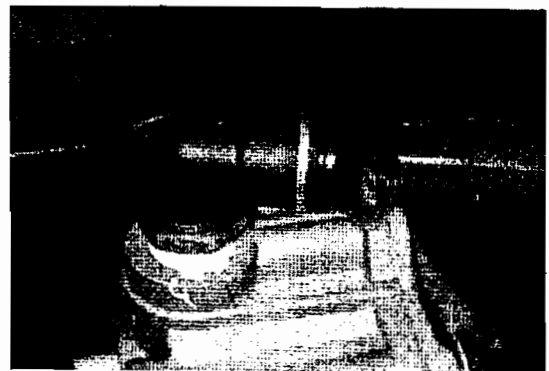

General Instructions:

Use a commercial grade teflon thread sealant on the threads of all fittings prior to installation.

Tubing is removed from fittings by first pushing and holding in on the collar, then pulling out on the tubing.

Prior to installing tubing into fittings verify the end of the tubing is cut square. Insert tubing into collar of fitting and push in firmly. Pull gently on the tubing to verify the lock has engaged.

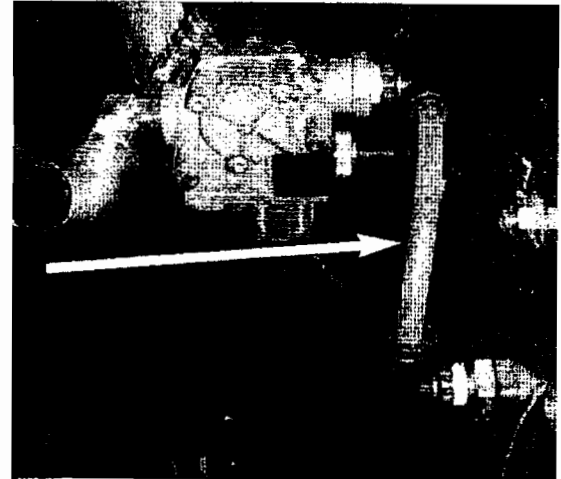

Apply parking brakes and adequately chock the wheels to prevent unintended vehicle movement. Place transmission in Neutral, shut off engine and remove keys from the ignition switch. Drain all air from air reservoirs using the purge valves on each tank.

1. Removal of bulkhead fittings and rerouting of front modulator valve supply hoses, both sides.

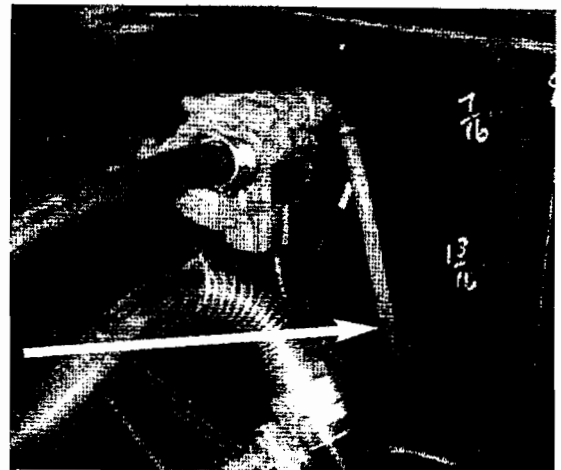

a. Jack cab up and secure locking arm with pin.

b. Inboard of each front wheel assembly, remove and discard the 1/2" green air line from the modulator valve to the bulk head fitting through the frame.

Original Configuration

c. Disconnect the airline on the back side of the bulkhead fitting, inside frame rail. Reroute this air line under the frame rail and install at modulator valve. Secure airline with tie wraps.

Reworked Configuration

d. Remove and discard bulkhead fitting.

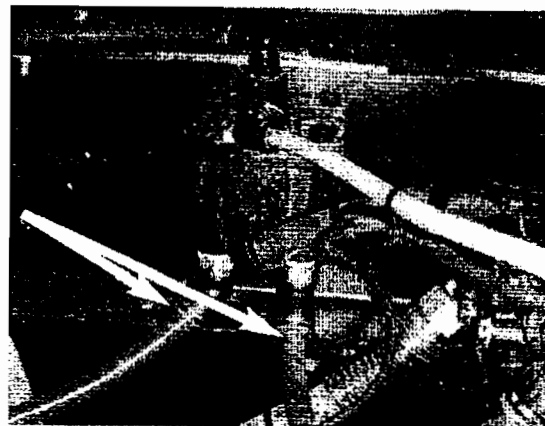

2. Repiping of the rear service relay valve.

a. Locate the rear service relay (R12 DC) valve mounted to the front street side of the rear axle cross member. On the underside of the valve, disconnect the two 5/8" red airlines piped to the rear ABS Modulator valves.

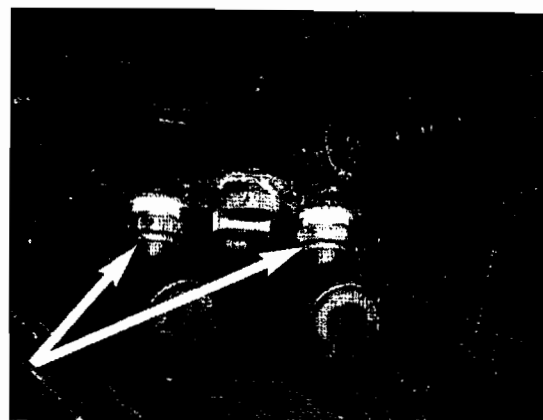

c. Remove and discard both 90-degree fittings from the R12 DC Valve.

d. Remove the plug from the right (curb side) rear port and install into the right front port.

Original Configuration

e. Install 45-degree fittings into the right rear and left front ports. Position fittings as shown in illustration at right.

Reworked Fitting Configuration

f. Reinstall the longer 5/8" red airline from the left front port of the R12 DC valve to the right ABS modulator valve (Cut to fit). Install the new 5/8" supplied red airline from the right rear port of the R12 DC valve to the left ABS modulator valve.

Reworked Airline Routing
