08V-129 AMENDED

December 30, 2008

National Highway Traffic Safety
Association Administration for Enforcement
Dan Smith, Administrator
1200 New Jersey Ave SE
NVS215 Room W46
Washington, DC 20590

Dear Mr. Smith,

Attached is the 573 application, Service Bulletin, recall notice to customers and Vehicle Identification Number amendment to Big Bear American Made Choppers current recall #08V-129.

If you have any questions, please contact Dena Valenzuela at dena@bigbearchoppers.com
(909) 878-4340 ext 119.

Sincerely,

David Ryan
General Manager
Big Bear American Made Choppers, Inc
41922 Fox Farm Road
Big Bear Lake, CA 92315

PART 573 Defect and Noncompliance Report

Amended 12-18-08

On March 17, 2008, Big Bear American Made Choppers decided that a defect which relates to motor vehicle safety exists in the motor vehicles listed below, and is furnishing notification to the National Highway Traffic Safety Administration in accordance with 49 CFR Part 573 Defect and Noncompliance Reports. As a result of analysis conducted subsequent to the March 17, 2008 08V-129 recall, we have elected to voluntarily expand the scope of the 08V-129 recall to include **VIN IDENTIFIED** 2004 and 2005 Prostreet models

Date this report was prepared: December 18, 2008

Manufacturer's Identification Code: 1B9/631

1. Big Bear American Made Choppers, Inc

David Ryan, General Manager

Phone: 909.878.4340

Fax: 909.866-4809

Name of person who prepared this report: David Ryan, General Manager

Signed: _____

I. Identify the Vehicle Models Involved in the Recall

2. Vehicles involved in recall

Make: Big Bear Chopper Model Years Involved: 2004
Models: Devil's Advocate Chopper
Production Dates: Beginning: 01-01-2004 Ending: 12-31-2004
VIN Range Beginning: **SEE ATTACHED** Ending: **SEE ATTACHED**
Vehicle Type: Motorcycle Body Style: Soft Tail

Make: Big Bear Chopper Model Years Involved: 2004
Models: SLED Chopper
Production Dates: Beginning: 01-01-2004 Ending: 12-31-2004
VIN Range Beginning: **SEE ATTACHED** Ending: **SEE ATTACHED**
Vehicle Type: Motorcycle Body Style: Soft Tail

Make: Big Bear Chopper Model Years Involved: 2004
Models: Venom Chopper
Production Dates: Beginning: 01-01-2004 Ending: 12-31-2004
VIN Range Beginning: **SEE ATTACHED** Ending: **SEE ATTACHED**
Vehicle Type: Motorcycle Body Style: Soft Tail

Make: Big Bear Chopper Model Years Involved: 2004
Models: Devil's Advocate Prostreet
Production Dates: Beginning: 04-13-2004 Ending: 12-23-2004
VIN Range Beginning: **SEE ATTACHED** Ending: **SEE ATTACHED**
Vehicle Type: Motorcycle Body Style: Soft Tail
***WELDED BY CERTAIN WELDER OR HAD NO WELD DOCUMENTATION**

Make: Big Bear Chopper Model Years Involved: 2004
Models: SLED Prostreet
Production Dates: Beginning: 04-13-2004 Ending: 12-23-2004
VIN Range Beginning: **SEE ATTACHED** Ending: **SEE ATTACHED**
Vehicle Type: Motorcycle Body Style: Soft Tail
***WELDED BY CERTAIN WELDER OR HAD NO WELD DOCUMENTATION**

Make: Big Bear Chopper Model Years Involved: 2004
Models: Venom Prostreet
Production Dates: Beginning: 04-13-2004 Ending: 12-23-2004
VIN Range Beginning: **SEE ATTACHED** Ending: **SEE ATTACHED**
Vehicle Type: Motorcycle Body Style: Soft Tail
***WELDED BY CERTAIN WELDER OR HAD NO WELD DOCUMENTATION**

Make: Big Bear Chopper Model Years Involved: 2005
Models: Devil's Advocate Chopper
Production Dates: Beginning: 01-01-2005 Ending: 12-31-2005
VIN Range Beginning: **SEE ATTACHED** Ending: **SEE ATTACHED**
Vehicle Type: Motorcycle Body Style: Soft Tail

Make: Big Bear Chopper Model Years Involved: 2005
Models: SLED Chopper
Production Dates: Beginning: 01-01-2005 Ending: 12-31-2005
VIN Range Beginning: **SEE ATTACHED** Ending: **SEE ATTACHED**
Vehicle Type: Motorcycle Body Style: Soft Tail

Make: Big Bear Chopper Model Years Involved: 2005
Models: Venom Chopper
Production Dates: Beginning: 01-01-2005 Ending: 12-31-2005
VIN Range Beginning: **SEE ATTACHED** Ending: **SEE ATTACHED**
Vehicle Type: Motorcycle Body Style: Soft Tail

Make: Big Bear Chopper Model Years Involved: 2005
Models: Devil's Advocate Prostreet
Production Dates: Beginning: 04-13-2004 Ending: 12-23-2004
VIN Range Beginning: **SEE ATTACHED** Ending: **SEE ATTACHED**
Vehicle Type: Motorcycle Body Style: Soft Tail
***WELDED BY CERTAIN WELDER OR HAD NO WELD DOCUMENTATION**

Make: Big Bear Chopper Model Years Involved: 2005
Models: SLED Prostreet
Production Dates: Beginning: 04-13-2004 Ending: 12-23-2004
VIN Range Beginning: **SEE ATTACHED** Ending: **SEE ATTACHED**
Vehicle Type: Motorcycle Body Style: Soft Tail
***WELDED BY CERTAIN WELDER OR HAD NO WELD DOCUMENTATION**

Make: Big Bear Chopper Model Years Involved: 2005
Models: Venom Prostreet
Production Dates: Beginning: 04-13-2004 Ending: 12-23-2004
VIN Range Beginning: **SEE ATTACHED** Ending: **SEE ATTACHED**
Vehicle Type: Motorcycle Body Style: Soft Tail
***WELDED BY CERTAIN WELDER OR HAD NO WELD DOCUMENTATION**

Make: Big Bear Chopper Model Years Involved: 2006
Models: Devil's Advocate Chopper
Production Dates: Beginning: 01-01-2005 Ending: 12-31-2005
VIN Range Beginning: **SEE ATTACHED** Ending: **SEE ATTACHED**
Vehicle Type: Motorcycle Body Style: Soft Tail

Make: Big Bear Chopper Model Years Involved: 2006
Models: SLED Chopper
Production Dates: Beginning: 01-01-2005 Ending: 12-31-2005
VIN Range Beginning: **SEE ATTACHED** Ending: **SEE ATTACHED**

Models: Venom Chopper
Production Dates: Beginning: 01-01-2005 Ending: 12-31-2005
VIN Range Beginning: **SEE ATTACHED** Ending: **SEE ATTACHED**
Vehicle Type: Motorcycle Body Style: Soft Tail

Descriptive Information which characterizes/distinguishes the recalled vehicles from those model vehicles not included in the recall:

*Originally this recall was limited to a vehicle type called "Chopper".
After initiating the 08V-129 recall, our review indicated many of the compromised motorcycles were welded by one individual employed by Big Bear American Made Choppers, Inc. from 04-13-2004 through 12-28-2004.*

As no procedure was found in the Safety Recall Compendium for revoking models that have been released as recall motorcycles, Big Bear American Made Choppers, Inc is amending the 08V-129 recall list, by adding all additional Prostreet motorcycles that the employee identified had welded and also motorcycles, where a Weld Sheet could not be located.

II Identify the Recall Population

3. Total Number of Vehicles Recalled Potentially Containing Defect

Model: Devil's Advocate Chopper Year: 2004
Number of Vehicles Potentially Involved: 25
Total Number Potentially Affected by the Recall: 25

Model: SLED Chopper Year: 2004
Number of Vehicles Potentially Involved: 1
Total Number Potentially Affected by the Recall: 1

Model: Venom Chopper Year: 2004
Number of Vehicles Potentially Involved: 221
Total Number Potentially Affected by the Recall: 221

Model: Devil's Advocate Prostreet Year: 2004
Number of Vehicles Potentially Involved: 22
Total Number Potentially Affected by the Recall: 22

Model: Venom Prostreet Year: 2004
Number of Vehicles Potentially Involved: 316
Total Number Potentially Affected by the Recall: 316

Model: Devil's Advocate Chopper Year: 2005
Number of Vehicles Potentially Involved: 30
Total Number Potentially Affected by the Recall: 30

Model: SLED Chopper Year: 2005
Number of Vehicles Potentially Involved: 7
Total Number Potentially Affected by the Recall: 7

Model: Venom Chopper Year: 2005
Number of Vehicles Potentially Involved: 184
Total Number Potentially Affected by the Recall: 184

Model: Devil's Advocate Prostreet Year: 2005
Number of Vehicles Potentially Involved: 11
Total Number Potentially Affected by the Recall: 11

Model: SLED Prostreet Year: 2005
Number of Vehicles Potentially Involved: 31
Total Number Potentially Affected by the Recall: 31

Model: Venom Prostreet Year: 2005
Number of Vehicles Potentially Involved: 92
Total Number Potentially Affected by the Recall: 92

Model: Devil's Advocate Chopper Year: 2006
Number of Vehicles Potentially Involved: 3
Total Number Potentially Affected by the Recall: 3

Model: SLED Chopper Year: 2006
Number of Vehicles Potentially Involved: 3
Total Number Potentially Affected by the Recall: 3

Model: Venom Chopper Year: 2006
Number of Vehicles Potentially Involved: 4
Total Number Potentially Affected by the Recall: 4

4. Approximate percentage of the total number of vehicles estimated to actually contain the defect: 47%

Identify and describe how the recall population was determined. In particular how the recalled models were selected and the basis for the beginning and final dates of manufacture for the recalled vehicles

The beginning and final dates of manufacture for recalled vehicles were initially determined by reviewing the dates we implemented changes to our welding processes. Once it was determined that all compromised vehicles were welded by a Big Bear American Made Choppers Inc 2004 employee, we used his employment dates as production dates, as the basis for recall expansion.

III. Describe the Defect of Noncompliance

5. Describe the defect of noncompliance. The description should address the nature and physical location of the defect or noncompliance. Illustrations should be provided as appropriate

The defect is a potential failure of a motorcycle frame at the point where frame tubes (B) and (C) connect to the Neck (A) as identified in illustration #1

Legend

- A **Neck Stem:** A machined steel piece that is fit with bearings or bearing cups that will be used to support the frontend
- B **Top Tube/Backbone:** A frame member that fits the space between the steering neck and the wishbone tubes. **Down tubes:** (there is either one or two of them) are welded to the neck stem at the front.
- C **Down Tube** (There is either one or two of them) are welded to the neck stem at the front

Describe the cause(s) of the defect or noncompliance.

The primary cause is insufficient penetration of the weld joint where tubes (B and C) connect to the Neck (A) as identified in illustration #1

A secondary concern is, failure to maintain frame and engine bolts to the correct torque can cause excessive vibration in the frame which can contribute to advancement of the weld failure in the identified areas

Describe the consequence(s) of the defect or noncompliance condition.

- *If the weld joint cracks and this failure continues a separation of the neck from the backbone and down tubes can occur resulting in frame failure and a possible loss of control of the motorcycle, if it is being driven*

Identify any warning which can (a) Precede or (b) occur.

1. *Visual inspection of the weld might indicate the onset of a weld failure. This would be in the form of a visible crack either along the edges of the weld or on the weld bead itself.*
2. *If the top motor mount is loose, vibration from the engine could be more apparent than normal this vibration is not a direct indicator of a weld joint failure. It is however a factor that can contribute to accelerated weld joint failure. If the top motor mount is left loose the frame will inevitably fail.*

If the defect or noncompliance is in a component or assembly purchased from a supplier, identify the supplier by corporate name and address

Not Applicable

Identify and name the CEO or knowledgeable representative of the supplier.

Not Applicable

IV. Provide the Chronology in Determining the Defect/Noncompliance

If the recall is for a defect, complete item 6, otherwise item 7.

6. With respect to the defect, furnish a chronological summary (including dates) of all the principle events that were the basis for the determination of the defect. The summary should include, but not be limited to, the number of reports, accidents, injuries, fatalities, and warranty claims.

1. *August 2007 a customer, who owned a 2004 Venom Chopper (Kit Bike) notified us that his frame (A) separated from the backbone (B) and the down tube, he was advised to bring the motorcycle in. Upon receiving the motorcycle, a warranty repair was completed.*

2. *January 28 2008 we were alerted by an email from an owner who indicated that on August 31 2007 he was traveling on a highway when the neck stem on his 2004 Devil's Advocate Chopper (kit bike) (A) separated from the backbone (B) and the down tube (C) resulting in a non injury single vehicle accident. January 29th 2008 we received a package from the same owner that included photographs of his vehicle with the frame tubes separated from the neck. Based on this information we decided to launch an investigation that resulted in this recall.*

3. *In March 2008 a customer notified us that his frame on his 2005 Devil's Advocate Chopper (kit bike) (A) separated from the backbone (B) and the down tube, he was advised to bring the motorcycle in. Upon receiving the motorcycle, the recall procedure was completed.*

4. July 2008 We were notified by a customer stating that his neck on his 2005 Devil's Advocate Prostreet (kit bike) had a crack in it. We received emailed pictures and advised him to bring in the motorcycle. We received the motorcycle in the shop and determined that the neck did have a crack in it. The recall procedure was completed. Based on this information we decided to launch an investigation that resulted in amending our current recall to include certain Prostreets.

5. July 2008, we received notification from a customer that while riding his 2004 Venom Chopper (kit bike) the neck stem (A) separated from the backbone (B) and the down tube (C) resulting in a non injury single vehicle accident. We advised him to send us his bike, he sent in the frame and the recall procedure was completed.

6. In December 2008, we received an x-ray picture of a neck weld on Scott Malota's 2004 Venom Chopper (kit bike) from Robert Young of NHTSA. Though the recall procedure was performed on Mr. Malotta's motorcycle, a subsequent review of data on recalled bikes and neck failures preempted Big Bear Choppers to expand the scope of the recall to cover all Prostreet Motorcycles welded by an employee that worked for Big Bear Choppers in 2004. Models included for amended recall are VIN identified Devil's Advocate, SLED, and Venom Prostreets

NUMBER OF REPORTS, ACCIDENTS, INJURIES, FATALITIES, AND WARRANTY CLAIMS

Reports	6
Accidents	2
Injuries	0
Fatalities	0
Warranty claims	2

7. With respect to the noncompliance identify and provide the test results or other data (in chronological order and including dates) on which the noncompliance was determined

On December 18, 2008 we pulled and reviewed weld sheets associated with the reports and accidents. We determined that an expansion of the scope of the recall was appropriate

REVIEW OF OWNER PHOTOGRAHPS - FRAME FAILURE - LARRY LANE

1. Inadequate weld penetration
2. Varying levels of oxidization (rust) on and around the weld joints that finally failed, Suggesting the failure was progressive and not sudden.

We pulled service records for this motorcycle and learned that this owner had:

- Modified his frame by drilling holes in the backbone (a structural member)
- Was operating the motorcycle for over 10,000 miles without the top motor mount being torqued to the factory specification. This condition would allow the transfer of excessive vibration energy from the engine to the frame. Proper torque of the top motor mount is a critical structural component required in the engineering design of this frame.
- Our records show we advised him of both these conditions in an email prior to the failure

SOFTWARE TESTING

Our investigation continued with Finite Element Analysis (FEA) of the existing frame design and other conditions that could contribute to frame or weld failure

Scenarios Included:

- 1 *Analysis of the frame as designed – Results verified proof of design*
- 2 *Analysis of a frame with a top motor mount loose – Allowed compounded flex in the frame and transferred additional stresses to the area that failed.*
- 3 *Analysis of additional gusseting – Results varied depending on the loads and and type of gusset. The information confirmed that our existing tube gusset has design integrity*

PHYSICAL EVALUATION - Hard Test

March 12, 2008 We acquired a 2005 motorcycle model of similar configuration built using the same techniques/processes as the one that triggered our initial investigation. We inspected the weld by:

1. Removing the coating
2. Inspected the weld joint for visible signs of failure at the surface and along the edges of which there were none
3. Grinding into the weld joints to understand the depth of penetration of each joint, to determine soundness of the weld between the neck (A) and the backbone (B). We determined, the joint between the neck (A) and the down tube (C) had insufficient penetration and was inadequate.

MANUFACTURING PROCESS REVIEW

Based on our investigation of our methods, processes and dates when new process improvements were implemented we were able to identify those years, and models of motorcycles that we believe need to be recalled.

V. Identify the Remedy

8. Furnish a description of the manufacturer's remedy for the defect or noncompliance. Clearly describe the difference between the recall condition and the remedy.

Initial remedies were a series of mailings to customers as our investigation evolved.

February 11, 2008	Service Bulletin – Top Motor Mount	See attachment A
February 25, 2008	Neck Gusset mailing	See attachment B
March 6, 2008	Letter requesting owners not to ride until we Complete our investigation	See attachment C

PERMANENT REMEDY

December 18, 2008	Amended Current Recall to include 2004 & 2005 Devil's Advocate, SLED and Venom Prostreets.	
March 13, 2008	Preparation of a Service Bulletin that defines detailed steps of this Safety Recall	See attachment D
December 18, 2008	Amended Part 573.8 Defect and Noncompliance Report, using the same remedy as contained in the original Service Bulletin dated March 19, 2008	

Example of a frame requiring the recall procedure

Example of a frame with recall procedure completed

Clearly describe the distinguishing characteristics of the remedy component/assembly versus the recalled component/assembly.

The remedy frame differentiation from the recalled frame is clearly apparent. The obvious distinction is a 1/4" plate (gusset) that occupies what was previously an open space where the neck, backbone, down tube(s) and original tube gusset are joined. This repair is outlined in attachment D on page 6 "NECK GUSSET UPGRADE"

Less obvious are the two completely new welds.

- *The first is common to the neck and the down tube(s). This weld repair is outlined in attachment D on page 4 "REPAIR OF LOWER WELD"*
- *The second is common to the neck and the backbone. This weld repair is outlined in attachment D on page 5 "REPAIR OF UPPER WELD"*

Identify and describe how and when the recall condition was corrected in production. If the production remedy was identical to the recall remedy in the field, so state. If the product was discontinued, so state.

The recall procedure is two-fold.

1. *Remove the old (suspect weld) and add new weld*
2. *Add gusset upgrade*

Since 2006 our manufacturing processes have been accomplishing the first requirement of the recall

- *Revised copes (the geometry of how the tubes/parts to be welded are prepared)*
- *Increased amperage used in our GTAW (TIG) welding processes*
- *Visual inspection of the heat signature that indicated good heat distribution at the weld area*

VI. Identify the Recall Schedule

Furnish a schedule or agenda (with specific dates) for notification to other manufacturers, dealers/retailers, and purchasers. Please identify any foreseeable problems with implementing the recall.

1. Notification to dealers: Five (5) days following NHTSA response.
2. Notification to purchasers of new submitted VINs re: employee welds: Ten (10) days following NHTSA response

VII. Furnish Recall Communications

9. **Furnish a final copy of all notices, bulletins, and other communications that relate directly to the defect or noncompliance and which are sent to more than one manufacturer, distributor, or purchaser. This includes all communications (including both original and follow-up) concerning this recall from the time your company determines the defect or noncompliance condition on, not just the initial notification. *A DRAFT copy of the notification documents should be submitted to this office by Fax (202-366-7882) for review prior to mailing.***

All prior notices were submitted with original 573.8 application

Note that these documents are to be submitted separately from those provided in accordance with Part 573.8 requirements.

SEE ATTACHMENT

NOTE: Our Finite Element Analysis (FEA) support that the present production techniques are more than adequate to prevent a frame failure in this area.

Big Bear Choppers

Service Bulletin

SAFETY RECALL

ATTENTION

Big Bear American Made Choppers, Inc. is conducting a Safety Recall on affected motorcycle models listed below, in order to inspect frame welds. Certain frame welds may not have sufficient strength where the neck is connected to the backbone and the down tube. There have also been instances where kit customers have:

- Modified their frames by adding holes
- Ground down welds for cosmetic purposes
- Not ensured the top motor mount is tight and torqued to the correct specification

In the worst case the weld could fail resulting in a separation of the neck from the frame. This could result in a crash. To date no serious injuries or fatalities have been reported.

AFFECTED UNITS

All 2004 Devil's Advocate Choppers
 All 2004 SLED Choppers
 All 2004 Venom Choppers
 VIN Identified 2004 Devil's Advocate Prostreets
 VIN Identified 2004 Venom Prostreets
 All 2005 Devil's Advocate Choppers
 All 2005 SLED Choppers
 All 2005 Venom Choppers
 VIN Identified 2005 Devil's Advocate Prostreets
 VIN Identified 2005 SLED Prostreets
 VIN Identified 2005 Venom Prostreets
 VIN Identified 2006 Devil's Advocate Choppers
 VIN Identified 2006 SLED Choppers
 VIN Identified 2006 Venom Choppers

CUSTOMER NOTIFICATION

Big Bear American Made Choppers, Inc. is sending a letter to the owners of model year 2004 and 2005 Devil's Advocate, SLED and Venom Chopper models, 2004 and 2005 **VIN Identified** Devil's Advocate, SLED and Venom Prostreets, 2006 **VIN Identified** Devil's Advocate, SLED and Venom Choppers advising them to contact a Big Bear American Made Choppers, Inc. dealer and schedule their motorcycle to have this Safety Recall procedure performed.

Your assistance is needed to ensure any of your customers with a recall model listed are informed of this Safety Recall. Please refer to Vehicle Identification Number list for all other Identified vehicles. A copy of the owner's letter sent is included at the end of this Service Bulletin.

CAMPAIGN VERIFICATION

Before you begin the recall procedure, check if the repair has been performed on the unit. If there is a $\frac{1}{8}$ " plate welded in the opening between the neck stem, down tube, and back bone the recall procedure has been performed.

- If the unit has been repaired no further action is required.
- If there is no plate in the opening proceed with the REPAIR PROCEDURE outlined in this Service Bulletin

completed

VIN AND OWNER INFORMATION

IMPORTANT: ENTIRE SERVICE BULLETIN MUST BE READ BEFORE PROCEEDING, ANY QUESTIONS REGARDING THIS PROCEDURE MUST BE DIRECTED TO BIG BEAR AMERICAN MADE CHOPPERS, INC. 909-878-4340

VIN Number _____

Owners Name _____

Owners Address _____

CUSTOMER INFORMATION: The information in this Service Bulletin is intended for use only by skilled technicians who have the proper training, tools and equipment to correctly maintain your Big Bear American Made Choppers, Inc. motorcycle. These procedures should not be attempted by "do it yourselfers" or home kit builders.

REPAIR PROCEDURE OVERVIEW

The following provides an overview of the repair procedure.

- Pre inspect and document the inspection criteria on the included inspection sheet. (page 3)
- You will have to remove the fuel tank and front end of the motorcycle and roll the handlebars and controls away from the triple tree location and secure them on the seat. (page 4)
- **Gas tungsten arc welding (GTAW) TIG is the ONLY weld process approved for this repair**
- A certified TIG welder must then perform the frame weld repair per the instructions in this Safety Bulletin, (pages 5, 6 and 7)
- Once repaired the affected area of the frame needs to be painted prior to the reassembly (page 7)
- Upon completion of the painting of the affected areas the motorcycle needs to be re assembled, with new bearing races, followed by the installation of the triple tree/handle bar assembly, front end, fuel tank and testing of the motorcycle (page 8)
- Return this completed Service Bulletin to Big Bear Choppers American Made Choppers, Inc. with the PROCEDURE VERIFICATION and motorcycle photographs for warranty claim reimbursement (page 8)

This area intentionally left blank

IMPORTANT: ENTIRE SERVICE BULLETIN MUST BE READ BEFORE PROCEEDING, ANY QUESTIONS REGARDING THIS PROCEDURE MUST BE DIRECTED TO BIG BEAR AMERICAN MADE CHOPPERS, INC. 909-878-4340

IMPORTANT: THIS DOCUMENT NEEDS TO BE RETURNED TO BIG BEAR CHOPPERS

You will use this Safety Recall Notice as:

1. As a working document to guide you in all the steps of this Safety Recall procedure.
2. As an Inspection log to document all observations and action taken during this procedure.
3. As part of your verification that all the work as been performed in accordance with this procedure.

NOTE: RECALL REPAIR CALIM WILL NOT BE REIMBURSED UNLESS THIS PAGE AND PAGES 5, 8, AND 11 ARE COMPLETED

PRE-INSPECTION PROCEDURE

A pre-inspection must be performed prior to any disassembly of the motorcycle to determine whether the owner has maintained the proper torque of the top motor mount or modified the frame in any manner.

1. Write the VIN Number and the customer name and address in the space allocated on the left hand side of page 1 of this Safety Bulletin.
2. Take a photograph of the motorcycle showing the full motorcycle RIGHT HAND SIDE. This photograph along with a second photograph showing the motorcycle after this Safety Recall procedure has been completed will need to be submitted to Big Bear Choppers American Made Choppers, Inc.
3. Using a calibrated torque wrench, test the torque of the single bolt that secures the top motor mount bracket (coil mount) to the frame (This will be on the RHS of the vehicle)
The requirement is 100 ft lbs. Document your findings below

Did the top motor mount bolt require a torque adjustment to attain the required torque setting?

Please circle

Yes

No

Signature _____

4. Using a calibrated torque wrench, test the torque of the two lower bolts that secure the top motor mount bracket to the motor. (They are located at the top of the motor on the LHS of the vehicle)
The requirement is 35 ft lbs. Document your findings below

Did the lower bolts require a torque adjustment to attain the required torque setting?

Please circle

Yes

No

Signature _____

5. Have any welds been ground down? *(See question on page 5 of 11)* _____

6. Have any holes been drilled in the frame or swing arm? _____

7. Visually inspect and note any obvious cracks around the neck, and top motor mount that is welded to the backbone _____

8. See questions on pages 5, 8 and 9 of 11. These must be completed

IMPORTANT: ENTIRE SERVICE BULLETIN MUST BE READ BEFORE PROCEEDING, ANY QUESTIONS REGARDING THIS PROCEDURE MUST BE DIRECTED TO BIG BEAR AMERICAN MADE CHOPPERS, INC. 909-878-4340

DIASSAMBLY PROCEDURE (DETAILED)

- Position and secure the motorcycle on a lift where:
- The front end can be safely removed
- The motorcycle neck is accessible from both sides so the TIG welder can perform the repair on both sides of the frame
- The motorcycle can be transported to and from the location the frame is going to so the repair can be painted.

Recommended hand tools

1. Remove seat and disconnect battery.
2. Disconnect the fuel line from carburetor float bowl, drain the fuel into a gas can.
3. Remove front fender, 4 x 5/16 hex head bolts secure it to lower legs.
4. Remove front wheel.
 - A. Loosen 5/16 socket head pinch bolt, rear of left lower leg.
 - B. Remove axle cap using small pick.
 - C. Remove axle from the right lower leg.
 - D. Wheel is now free to be removed.
5. Disconnect front brake line from caliper, cap end of line or drain fluid.
6. Remove clutch cable from left side hand control.
 - A. Fully compress clutch cable adjustment.
 - B. Remove c-clip from rotation pin on hand control, pull pin, remove clutch lever and cable.
 - C. Pull clutch cable back under frame and secure.
7. Remove headlight and turn signals, pull away from front end and secure.
8. Remove legs.
 - A. On one side of front end loosen the two pinch bolts in rear of tree (do not fully remove pinch bolts).
 - B. With pinch bolts loosened leave hex key or socket in bolt, strike with dead blow hammer to free leg and remove.
 - C. Repeat for other side.
9. Gas tank removal
 - A. Disconnect cross over (if needed).
 - B. Disconnect vent hose from right side of tank.
 - C. Remove the 4 mounting bolts under tank.
 - D. Tank can now be removed.
10. Remove handlebars and trees.
 - A. Loosen neck stem set screw located in rear of lower tree
 - B. Remove stem nut, lower tree, and bearing
 - C. Remove top tree, bearing, and dust cap with handlebars and wiring still attached.
 - D. Pull top tree and bars over backbone and secure.
11. Remove both upper and lower neck race.
12. The motorcycle is now ready to proceed with the repair procedure.

The photograph sequence above shows the method to remove the handlebars, upper triple tree and neck stem as an assembly and secure the assembly on the seat.

IMPORTANT: ENTIRE SERVICE BULLETIN MUST BE READ BEFORE PROCEEDING, ANY QUESTIONS REGARDING THIS PROCEDURE MUST BE DIRECTED TO BIG BEAR AMERICAN MADE CHOPPERS, INC. 909-878-4340

REPAIR PROCEDURE (DETAILED)

Recommended hand tools and gusset that will need to be trimmed

Take appropriate steps to fully protect ALL engine, frame and control components from grinding sparks, dust, and tools.

Ensure that the rear of the vehicle, seat, stored handlebars, and the rear fender are also protected.

Photograph showing protective covering on the motor and primary

Remove frame paint/powder coating from around the repair area

The grinder might not be able to reach all the areas for paint/powder removal

Use a file or hacksaw blade to remove any residual coating and finish with a stainless steel wire brush

After the stainless steel wire brush procedure, slowly cut into the tubing and the weld (not the neck)

1. Was there a crack in the base of the material?

YES

NO

2. If so, estimate how deep you ground down before you saw a crack on the base of the material? _____" (eg 1/16")

3. In your opinion was the penetration of the weld sufficient?

YES

NO

Welders Signature _____

REPAIR OF LOWER WELD FIRST – WORK ON ONE JOINT AT A TIME

Removal of weld around the neck and downtube

Using a thin grinding wheel remove the existing weld around the joint

Carefully remove the original weld. And prepare the joint per the illustration to the right

Illustration showing desired joint preparation and weld penetration

WELDING OF NEW ROOT PASS

Using TIG process and .045" ER70 rod weld a root pass

Completed root pass weld

The down tube is .156" wall
The neck is approx .400" thick
in the areas of the weld joint

WELDING SECOND COVER PASS (MANDATORY)

Using TIG process and 3/32" ER70 Rod weld a second pass

Photo of a concave/undercut 2nd Pass, requiring third weld pass

The second cover pass is mandatory
Upon completion of the second pass inspect the profile of the weld.
If the weld profile exhibits a concave form or is undercut, a third pass weld **MUST** be performed.

**ALLOW COOL DOWN PERIODS
IN BETWEEN THE WELDS TO
PREVENT OVERHEATING**

IMPORTANT: ENTIRE SERVICE BULLETIN MUST BE READ BEFORE PROCEEDING, ANY QUESTIONS REGARDING THIS PROCEDURE MUST BE DIRECTED TO BIG BEAR AMERICAN MADE CHOPPERS, INC. 909-878-4340

WELDING THIRD PASS (IF REQUIRED)

Using TIG process and a .062" ER70 rod to complete the third pass

Finished lower weld with convex form

Upon completion of of this weld, the joint must exhibit a convex profile as depicted in the photograph to the left.

ALLOW COOL DOWN PERIODS IN BETWEEN THE WELDS TO PREVENT OVERHEATING

REPAIR OF UPPER WELD

Removal of weld around the neck and backbone

Complete the same steps for the upper joint (back bone to the neck) as described above in the "Repair of Lower Weld"

Using TIG process and .045" ER70 rod weld a root pass

ALLOW COOL DOWN PERIODS IN BETWEEN THE WELDS TO PREVENT OVERHEATING

Continue with welding the second pass with a 3/32" ER70 rod
Inspect the second pass as above
Perform a third pass weld if required using .062" ER70 rod

ALLOW COOL DOWN PERIODS IN BETWEEN THE WELDS TO PREVENT OVERHEATING

View showing upper joint ready for root weld pass

View of root pass completed

View showing the completion of the 3rd and final weld pass

View showing the two new welds

IMPORTANT: ENTIRE SERVICE BULLETIN MUST BE READ BEFORE PROCEEDING, ANY QUESTIONS REGARDING THIS PROCEDURE MUST BE DIRECTED TO BIG BEAR AMERICAN MADE CHOPPERS, INC. 909-878-4340

NECK GUSSET UPGRADE – INSTALLATION – MANDATORY (NOT OPTIONAL)

To complete this safety recall procedure you will need to install a 1/4" plate gusset as described below.

Create a poster board template that fits inside the opening inside the frame behind the neck

The template should represent the opening along the centerline of the tubes.

Poster board template trimmed to fit in the frame opening.

Transfer the profile of the template to the 1/4" thick plate using a permanent marker as shown

EACH GUSSET MUST BE CUSTOM FIT TO WITHIN 1/32" (0.032") OF THE OPENING

Cut and grind the 1/4" plate so that it fits inside the frame opening. There should be no more than 1/32" gap all the way around the plate and the opening.

Proceed to tack weld the plate in place on both sides.

Completely weld the plate 100% of the perimeter on both sides.

ALLOW COOL DOWN PERIODS IN BETWEEN THE WELDS TO PREVENT OVERHEATING

Example of a trimmed plate ready to be welded into frame opening.

Position the plate in in the opening along the centerline of the tubes.

Completed weld

This picture shows a frame after the completion of this safety recall procedure.

WELDER INFORMATION

- Please complete the following and indicate who performed the weld repair

Name of Welding Company	Name of Welder	TIG (GTAW) Certificate Number

PAINTER INFORMATION

- Arrange to have the repaired weld area painted.
- Once the vehicle is repainted, proceed with the re-assembly procedure (page 8).
- Please complete the following to indicate who performed the paint repair.

Name of Paint Shop	Name of Painter	Telephone Number of Paint Shop

IMPORTANT: ENTIRE SERVICE BULLETIN MUST BE READ BEFORE PROCEEDING, ANY QUESTIONS REGARDING THIS PROCEDURE MUST BE DIRECTED TO BIG BEAR AMERICAN MADE CHOPPERS, INC. 909-878-4340

MOTORCYCLE RE-ASSEMBLY PROCEDURE

- | | | |
|--------|--|---|
| Signed | Signature or initials is required on all tasks | |
| _____ | | 1. Install new races per standard industry practices |
| _____ | | 2. Reinstall top tree bearing and dust cap |
| _____ | | 3. Install lower bearing and tree using red locktite on the nut, (do not torque nut until complete assembly of front end) |
| _____ | | 4. Install legs into trees and snug pinch bolts |
| _____ | | 5. Install front wheel using anti-seize and 60 foot pounds of torque on axle |
| _____ | | 6. Torque axle pinch bolt to 20 ft lbs |
| _____ | | 7. Install front fender using red locktite on fasteners |
| _____ | | 8. Connect front brake line to caliper (re-bleed brake as needed) |
| _____ | | 9. Install clutch cable on left hand control (adjust cable accordingly) |
| _____ | | 10. Install headlight and turn signals |
| _____ | | 11. Torque top tree pinch bolts to 20 ft lbs |
| _____ | | 12. Torque main stem nut, 90 to 100 ft lbs (or until a 2 inch fall away is achieved) tighten stem nut pinch with red locktite applied |
| _____ | | 13. Torque lower tree pinch bolts to 20 ft lbs |
| _____ | | 14. Install gas tank using anti-seize on all fasteners |
| _____ | | 15. Reconnect fuel line, crossover, and vent line |
| _____ | | 16. Connect battery, torque to 60 inch lbs |
| _____ | | 17. Install seat using anti-seize on hardware |
| _____ | | 18. Verify that the top motor mount is properly torque |
| _____ | | 19. Torque the center bolt to 100 ft lbs & the side bolts to 35 ft lbs |
| _____ | | 20. Attach warning decal on top of the key housing. |
| _____ | | 21. Take a photograph of the motorcycle showing the full motorcycle RIGHT HAND SIDE after this Safety Recall procedure has been completed |

PROCEDURE VERIFICATION

- | | | |
|--------|------|---|
| Signed | Date | Signature is required on all tasks |
| _____ | | 1. Verify that the VIN number and owners name and address have been entered on page 1. |
| _____ | | 2. Verify that the VIN number entered on page 1 matches the VIN number on the motorcycle. |
| _____ | | 3. Verify that you have a photograph as required in item #2 on page 3. |
| _____ | | 4. Verify that inspection Item #3 on page 3 has been performed correctly. |
| _____ | | 5. Verify that inspection Item #4 on page 3 has been performed correctly |
| _____ | | 6. Verify that inspection Items #5, 6, and 7 on page 3 have been performed correctly. |
| _____ | | 7. Verify that the welder's information is recorded on page 7. |
| _____ | | 8. Verify that the painter's information is recorded on page 7. |
| _____ | | 9. Verify that the motorcycle assembly procedure has been completed and tasks are signed or initialed on page 8 |
| _____ | | 10. Verify that you have a photograph as required in item 21# on page 8 |

IMPORTANT: ENTIRE SERVICE BULLETIN MUST BE READ BEFORE PROCEEDING, ANY QUESTIONS REGARDING THIS PROCEDURE MUST BE DIRECTED TO BIG BEAR AMERICAN MADE CHOPPERS, INC. 909-878-4340

PARTS INFORMATION

Big Bear American Made Choppers, Inc will be sending you one initial kit, others are available for ordering free of charge.

P/N Recall 2008-1 kit

This kit includes
¼" gusset (1)
Bearing race set (1)
Warning Decal (1)

WARRANTY TIMES

Disassembly time	45 minutes
Weld Repair time	2.0 hours
Paint/Transportation allowance	\$300.00
Re-assembly time	2 hours

WARRANTY CLAIM PROCESS

This Safety Recall will be in effect until all units have been repaired according to this Service Bulletin, regardless of the date of purchase.

Normal warranty claim submission requirements apply. After completion of the repair, submit one warranty claim per unit with the following information only:

Note: If the Big Bear Choppers Warranty department provides you with different claim filing instructions. Please file your claim per those instructions. Do not file two claims for the same unit.

Prior to being reimbursed you must complete and submit this Service Bulletin to Big Bear Choppers Pay special attention to the **PROCEDURE VERIFICATION** of this Safety Recall (page 8).

This is the end of the Service Bulletin Safety Recall Procedure

Page 11 is a copy of the letter sent to owners

December 18, 2008

IMPORTANT SAFETY RECALL NOTICE

Dear Big Bear Chopper Owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

What is the reason for this notice?

Big Bear Choppers has decided that a defect, which relates to motor vehicle safety, exists in 2004 and 2005 Devil's Advocate, SLED and Venom Choppers. Also included are VIN IDENTIFIED 2004 and 2005 Devil's Advocate, SLED and Venom Prostreets and VIN IDENTIFIED 2006 Venom, Devil's Advocate and Sled Choppers that were manufactured prior to 12-31-05. Some vehicles may have inadequate weld penetration between the neck, backbone, and down tubes of the frame. High loads created when riding on rough road surfaces, and or structural modification made to the frame by owners, failure to maintain the specified torque setting of the top motor mount may cause the effected welds to crack. Worst case scenario, the welded area could break without warning resulting in neck separation and front end collapse. This could result in a crash.

To date, we have not had any serious injuries or fatalities associated with this defect, however, we believe the potential risk warrants this recall action

What should you do?

1. **STOP RIDING YOUR MOTORCYCLE IMMEDIATELY. YOU MUST NOT RIDE YOUR MOTORCYCLE UNTIL THIS RECALL HAS BEEN COMPLETED**
2. Please contact your Big Bear Choppers dealer as soon as possible to arrange a service date. Instructions for making this correction have been sent to your dealer and the parts necessary for the repair are available. A neck gusset will be installed as a basis for identifying bikes that have had the correction made. Labor time necessary to perform this service correction is approximately 5 hours, excluding paint time. Please ask your dealer if you wish to know how much additional time will be needed to schedule and process your vehicle. The inspection and any necessary repairs will be done *free of charge*. A paint allowance for the area affected by this Safety Recall procedure is included in the dealer Service Bulletin.

Who to contact if you experience problems.

Your Big Bear Choppers dealer is best equipped to obtain parts and provide service to ensure that your vehicle is corrected as promptly as possible. If, however, you take your vehicle to your dealer on the agreed service date, and they do not remedy this condition within seven (7) days, we recommend you contact the Big Bear Choppers factory by calling 909-878-4340. After contacting your dealer and the Big Bear Choppers factory, if you are still not able to have the safety defect remedied without charge and within a reasonable time, you may write to:

Administrator National Highway Traffic Safety Administration
400 Seventh Street, SW Washington, DC 20590
Or call 1-888-DASH-2-DOT (1-888-327-4236)

What to do if you feel this notice is in error.

Our records show you are an owner of a model subject to this Safety Recall Notice. If this is not the case, and you have sold or traded your vehicle, please let us know by completing the enclosed postage paid information change card and returning it to us. We will then update our records.

If you have questions.

If you have any questions about this notice, or need assistance locating a Big Bear Choppers dealer, please call the Warranty Department at 909-878-4340. You may also go to our website www.bigbearchoppers.com and click on "Dealers" to locate the nearest Big Bear Chopper Dealer.

We apologize for any inconvenience we may have caused you, and are taking this action in the interest of your safety and continued satisfaction with our product.

Sincerely,

Big Bear American Made Choppers, Inc.

IMPORTANT: ENTIRE SERVICE BULLETIN MUST BE READ BEFORE PROCEEDING, ANY QUESTIONS REGARDING THIS PROCEDURE MUST BE DIRECTED TO BIG BEAR AMERICAN MADE CHOPPERS, INC. 909-878-4340
