Mr. Daniel C. Smith  
Associate Administrator for Enforcement  
National Highway Traffic Safety Administration  
Recall Management Division (NVS-215)  
1200 New Jersey Avenue, SE – Room W45-306  
Washington, D.C. 20590

Dear Mr. Smith:

The following is an update of the 573.6(c)(2)(3)(4) information (NHTSA 01V-364 / GM 01073) in our November 30, 2001 letter as it relates to a decision by General Motors to recall certain 2000-2002 Chevrolet Blazer, GMC Jimmy and Oldsmobile Bravada, excluding right-hand drive vehicles for hazard or multifunction switches. This information is submitted pursuant to the requirements of 49 CFR 573.6.

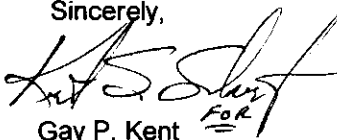

This determination was made following a thorough investigation. The basis for the determination included consideration of increase number of warranty claims, customer complaints and field reports. GM, with assistance from Delphi, discovered during the investigation that several design and process changes had been implemented on the hazard switch during production of the subject vehicles. These changes described above caused an increase in electrical resistance within the switch which contributed to the hazard and/or rear brake lamps being inoperative.

Upon further investigation, GM has now discovered that a certain number of vehicles were erroneously excluded from the recall and not repaired to date.

573.6(c)(2)(3)(4): The additional vehicle population information is shown on the attached sheet.

573.6(c)(9): GM will provide copies of the dealer bulletin and owner letter when available. The anticipated mail dates for the dealer bulletin is June 10, 2008 and the owner letter is June 17, 2008.

If you have any questions regarding this revision to GM's November 30, 2001 letter please call.

Sincerely,  
  
Gay P. Kent  
Director  
Product Investigations
