The manufacturer of the vehicles covered by this Report is;

Sundowner Trailers, Inc.
9805 OK Hwy 48 South
Coleman, OK 73432

Vehicles Involved:

The vehicles covered by this Report are recreational vehicles that were equipped with certain models of refrigerators manufactured by Dometic Corporation from the 20th week of 2003 through the 39th week of 2006. We are currently identifying all models and individual units in question and will provide this information as soon as we have. All of our documentation on these older models is hardcopy only. We have assigned this task to (7) employees who are working full time. We estimate having the information needed by August 15th 2008.

The vehicles were manufactured during the period from 20th week of 2003 through 39th week of 2006.

Models could include; Sunlite LQ 550, 575, 740, 760, 700 gn, 705 gn, 710 gn, 720 gn, 725 gn, 727 gn, 737 gn, 777gn, Cargo gn, ProStock gn, StampedeSL gn, and Stock gn.

Total number of units manufactured between 20th week of 2003 through the 39th week of 2006 are, 2,185. Out of this total we are in the process of identifying which units have the suspected defective refrigerators.

Dometic has arranged to conduct a recall to remedy the potential defect in Sundowner's vehicles at no charge to vehicle owners. See Recall No. 08E-032. Pursuant to 49 CFR 573.6(c)(8)(i) and 573.13, owners will be advised that Dometic will reimburse them if they have incurred costs to obtain a remedy for a refrigerator containing such a defect prior to their receipt of the notification.

Sundowner has elected to allow Dometic Corporation to manage the administration of the forthcoming recall.

Dometic has stated that they will use the same remedy in this expanded recall as in the original recall 06E076. Only the serial numbers for these units will be different, as the model numbers are all the same..

Sincerely,
Vic Cook
Engineering Manager
