Dear Ms. Wallace:

573.6 Defect Information Report

573.6.c.1.

Vehicle manufacturer's full name:

Polaris Industries Inc., Victory Motorcycle Division

Address:

2100 Highway 55
Medina, MN 55340-9800

573.6.c.2.

Vehicles potentially containing defect:

MY 2008 Victory Vision motorcycles.

Vehicle Identification Numbers:

A list of affected VINs is attached separately as Attachment c.2.

Inclusive dates of manufacture:

May 14, 2007 through May 7, 2008.

Basis for recall population:

All MY 2008 Victory Vision motorcycle models that have been produced.

573.6.c.3.

Total number of vehicles potentially containing defect:

A total of 2444 vehicles may contain this defect.

573.6.c.4.

Percentage of vehicles estimated to actually contain defect:

Victory estimates that approximately two to five percent of the manufactured units may have one of the defects being reported.

573.6.c.5.

Brief Summary:

Victory has determined that a defect may exist in the assembly of the 40-amp main circuit breaker which may cause an intermittent or nonexistent connection during vehicle operation. A poor connection at the 40-amp main circuit breaker could cause a lack of battery voltage to reach the Engine Control Module (ECM) and other electrically controlled components of the motorcycle.

Additionally, it has been determined that the ECM programming can be sensitive to unusual rider input (such as frequent throttle movement at stop-lights or sustained coasting with the clutch disengaged) and can cause the vehicle to die unexpectedly. The vehicle will immediately restart with the starter or by releasing the clutch (in the case of sustained coasting with the clutch disengaged).

Detailed description:

Victory has determined that some inconsistencies in proper torquing of the terminal nuts for the 40-amp main circuit breaker may have occurred during the manufacturing process. The improper assembly of the 40-amp main circuit breaker terminals can intermittently cause a loss of battery voltage at the ECM and other electrically controlled components. Assembly line procedures have been changed to eliminate this issue going forward.

If a poor terminal connection were to exist, the machine might exhibit an intermittent misfire or the engine may unexpectedly shut off. The lighting system of the vehicle may also display intermittent or no operation if this condition were to exist.

In the case of the ECM programming, Victory has determined that under unusual and specific rider inputs that the vehicle may die unexpectedly. This issue was not observed during pre-production testing since the rider inputs necessary to induce the issue are not part of normal driving habits. Our test riders did not operate the vehicles in the manner which could cause the issue.

573.6.c.6.

Chronology:

Victory is aware of twenty field reports involving a loose connection at the 40-amp main circuit breaker. The first field report was received in January of 2008, the second was received in February of 2008, the third report was received in March of 2008 and no reports were received in April of 2008 for this issue. Four reports were received in June of 2008, six in July of 2008 and three reports were received in August of 2008.

Victory has now determined that these twenty complaints are related and due to the main 40-amp circuit breaker. It was not apparent that these complaints were related and it was difficult to determine the root cause when the early reports came in for a variety of reasons.

First, existing Safety Recalls (Voltage Regulator Replacement and Ignition Switch Repair) are in place for some of the affected population. The symptoms associated with these recalls are similar to those resulting from the subject defect and were initially thought to be related to these original recalls.

Second, the failure can be very random and infrequent in nature in that a problem might be experienced one day and may not be able to be duplicated by the dealership technician and the customer may not experience the problem again for several weeks. In some instances the problem was reported to be repaired by replacing some component or completing one or both of the outstanding recalls, but the owner would experience the same problem at a later date.

Lastly, Victory received fifteen reports of the engine either dying at a stoplight where it was reported that the operator was frequently moving the throttle or during sustained deceleration with the clutch disengaged. These reports were received beginning in November of 2007 through July of 2008. This issue proved to be very difficult to isolate as it is dependent upon the rider's driving habits which are unusual. As specific rider inputs are needed to duplicate and understand the issue; the issue is very random in nature and tends to occur sporadically.

573.6. c.8.

Remedy program:

Victory will conduct a safety recall by which we will require our dealer network to properly torque the terminal lug nuts at the 40-amp main circuit breaker and to download new programming into the ECM.

All of the affected machines have been delivered to Victory's dealer network. For those machines that are still at dealers, those dealers will be required to perform the repairs prior to delivery to consumers.

Victory will contact consumers who have purchased one of the affected vehicles and instruct them to present their machines to an authorized Victory dealer so that the repairs can be made.

Estimated date on which notifications to Owners will begin:

September 15, 2008.

Estimated date on which notification will be completed:

September 22, 2008.

573.6.c.10.

Owner letter:

See attached Owner Notification letter.

SUBJECT: Loose Circuit Breaker Terminal Nuts and ECM Reprogramming

PURPOSE: Victory has decided that two possible defects exist on affected vehicles that could cause the engine to stall:

- 1) The terminal nuts that secure the main power supply wires could be loose at the circuit breaker, which can cause an unexpected loss of electrical power to the vehicle.
- 2) The current fuel / ignition map (pre-programmed into the Electronic Control Module or "ECM") can cause engine stalling under unusual and specific rider inputs.

Either of the defects listed above could cause the vehicle to stall, increasing the risk of a loss of control and a vehicle crash.

AFFECTED MODEL(S):

Model	Model Number(s)	Vehicle Identification Numbers (VIN)
2008 Victory Vision Street™	V08S136; V08SB36CAP, CCP, CD, CDP V08SB36DA, DAP, DC, DCP, DD, DDP V08SB36LAP, LC, LCP, LD, LDP	Enter the VIN number in "Unit Inquiry" on the dealer web site to determine if this bulletin applies before performing this repair.
2008 Victory Vision Tour™	V08S236; V08SD36CA, CAP, CAT, CC, CCP, CCT, CD, CDP, CDT V08SD36DA, DAP, DAT, DC, DCP, DCT, DD, DDP, DDT V08SD36LA, LAP, LAT, LC, LCP, LCT, LDP, LDT	Enter the VIN number in "Unit Inquiry" on the dealer web site to determine if this bulletin applies before performing this repair.

WHAT YOUR DEALERSHIP SHOULD DO:

Note: It is a violation of Federal law for a dealer to deliver a new motor vehicle or any new or used item of motor vehicle equipment (including a tire) covered by the notification under a sale or lease until the defect or noncompliance is remedied.

1. Enter the Vehicle Identification Number in unit inquiry to see if this bulletin applies.
2. If the vehicle is affected, follow instructions on page 4 to inspect and torque the circuit breaker nuts.
3. Tighten both circuit breaker terminal nuts to specified torque as outlined on page 4.
4. Reprogram the ECM with new calibration as outlined on page 5. You must have Digital Wrench™ Version 3.1 installed on your laptop computer to complete this bulletin procedure.
5. File a warranty claim immediately after completion of this bulletin. Follow warranty claim filing procedures on page 2.

The information contained within this bulletin is confidential and protected by U.S. and international copyright laws, and is the property of Polaris Industries Inc. This service bulletin is provided for the sole use of authorized Polaris dealers and distributors. This service bulletin is not to be distributed, duplicated, or copied, digitally or otherwise, without the written consent of Polaris Industries Inc. © 2008 Polaris Sales Inc.

CUSTOMER NOTIFICATION:

A customer Notification letter 08V-xxx (08-xxx in Canada) will be sent to registered owners of motorcycles affected by this bulletin. An example of the US Consumer letter is shown on page 3.

In addition to the notification letter sent by Victory, dealers are required to notify owners of motorcycles sold by their dealership, and to make arrangements to perform this bulletin repair immediately.

PARTS INFORMATION:

PART NUMBER / DESCRIPTION	7170107
QUANTITY	1 completion decal required per affected unit
DIRECT SHIP FROM VICTORY?	NO
TO BE ORDERED BY DEALERS?	NO
AVAILABLE TO ORDER	NO

WARRANTY CLAIM INFORMATION:

A single group claim may be submitted listing the complete 17-digit VIN for machines WITH THE SAME MODEL NUMBER. File claim type **SB (Service Bulletin)**. DO NOT ENTER MORE THAN ONE MODEL NUMBER ON A WARRANTY CLAIM. All warranty claims must be submitted within 10 days of the repair. Never submit a warranty claim before completing the work. It is in violation of your dealer agreement to submit a warranty claim prior to the work being completed. Removed components are to be retained according to the Polaris Warranty Policy for possible return to the Warranty Department

Service Bulletin Number	V-08-03
Claim Type	SB
Labor Allowance	:18 Minutes
Claim Part Numbers	Automatically entered by warranty system

SERVICE BULLETIN COMPLETION DECAL:

- 1) Fill out a Service Bulletin Completion Decal, PN 7170107.
- 2) Clean the surface of the inside of the rear console cover.
- 3) Remove the decal from the sheet and apply as shown.
- 4) Peel adhesive backing off of the *clear* protective outer film of decal.
- 5) Press the clear film firmly over the decal.

If you require more decals, order them through normal parts ordering channels.

Fill out Decal with all required information.

Remove rear console cover and apply to underside.

Sincerely,

Laurie Rengel
Manager, Service Dealer Development and Warranty

SAFETY RECALL NOTICE

Recall Campaign: 08V-xxx

Subject: Circuit Breaker Terminal Nuts and ECU Reprogram

Reference: Safety Recall Bulletin V-08-03

PLEASE READ IMMEDIATELY

Dear Victory Owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. The Victory Motorcycle Division of Polaris Industries Inc. has decided that a defect which relates to motor vehicle safety exists in some 2008 Victory Vision™ motorcycles. Our records indicate that you have purchased a potentially affected vehicle.

The reason for this recall:

Victory has decided that two possible defects exist on affected vehicles that could cause the engine to stall. 1) The terminal nuts that secure the main power supply wires could be loose at the circuit breaker, which can cause an unexpected loss of electrical power to the vehicle. 2) The current fuel / ignition map (pre-programmed into the Electronic Control Module or "ECM") can cause engine stalling under unusual and specific rider inputs.

Either of the defects listed above could cause the vehicle to stall, increasing the risk of a loss of control and a vehicle crash.

What Victory and your dealer will do:

Victory has issued *Safety Recall Bulletin V-08-03* to all Victory dealers, with instructions required to inspect and tighten the circuit breaker terminal nuts and re-program the ECU on all affected vehicles. Repairs will be made by any authorized Victory motorcycle dealer at no cost to you. The actual repair will take approximately 45 minutes to perform; however, it may take longer due to service scheduling requirements.

What you should do:

Please call your authorized Victory motorcycle dealer to schedule an appointment to have the bulletin repair performed. Do not attempt repairs yourself. Repairs must be done only by an authorized Victory motorcycle dealer.

DO NOT OPERATE YOUR MOTORCYCLE UNTIL ALL REPAIRS HAVE BEEN COMPLETED!

If you have questions or if you need more information:

While your Victory dealer is in the best position to answer your questions, if you have any questions that your dealer cannot address, if you are having difficulty obtaining the recall repair outlined in this letter, or if you need assistance finding a Victory Dealer, please contact our Victory Consumer Service Department by calling 1-888-704-5290 or visit the Polaris/Victory Motorcycle web site at www.polarisindustries.com.

This notice was mailed to you according to our most current registration information. If you no longer own your Victory motorcycle, please contact your local Victory dealer to have the ownership information changed. The Consumer Service Department cannot change ownership information without identification. Federal law requires that any vehicle lessor receiving this recall notice must forward a copy of this notice to the lessee within 10 days.

If you have had this repair performed before you received this letter, you may be eligible to receive reimbursement for the cost of obtaining a pre-notification remedy of the problem associated with this recall. For more information regarding obtaining reimbursement please contact the Victory Consumer Service Department using the contact information above.

If you believe that the Victory Motorcycle Division of Polaris Industries Inc. has failed to remedy this defect without charge or is unable to do so within a reasonable time, you may submit a complaint to the Administrator, National Highway Traffic Safety Administration, 1200 New Jersey Avenue SE., Washington, D.C. 20590; or call the toll-free Vehicle Safety Hotline at 1-888-327-4236 (TTY: 1-800-424-9153); or on the web go to <http://www.safercar.gov>.

Please accept our apologies for any inconvenience this may cause you. Your safety and continued satisfaction with your Victory motorcycle is our primary concern. Thank you for your prompt attention to this matter.

Sincerely,

Laurie Rengel
Manager, Service Dealer Development & Warranty

INSTRUCTIONS

Overview: Tighten *both* circuit breaker terminal nuts to specified torque on all affected vehicles. Use a thin wall socket to ensure full engagement with the nut. Keep the socket at a 90 degree angle to the terminal stud when torquing the nuts.

Circuit Breaker Terminal Nut Torque

1. Remove battery negative (-) cable (A). (Fig. 1)
2. Remove screw (B) from electrical cover (4mm internal hex). (Fig. 1)
3. Loosen screw (C).
4. Place a protective cloth between cover and lower leg fairing. Prop cover for access to circuit breaker (D). (Fig. 2)
5. Lift protective cover off circuit breaker.
6. Using a thin wall 3/8 inch deep socket, torque *BOTH* nuts to 25 lb-in (2.8 Nm). (Fig. 3)
7. Re-install protective cover securely over circuit breaker, pushing it firmly onto the studs. (Fig. 4)
8. Set electrical cover back in place and remove protective cloth.
9. Install screw. Torque both screws to x.x Nm (xx lb-in).
10. Install battery negative cable. Torque terminal bolt to 4.5 Nm (40 lb-in).
11. Perform reflash procedure following basic procedure outlined on page 5, and instructions within Digital Wrench.

ECM Reprogramming

1. Open left saddlebag door and remove protective cap from diagnostic connector.
2. Connect interface cable (PV-xxxx) to laptop computer and diagnostic connector on vehicle.
3. Turn ignition key on and start Digital Wrench.
4. Open *Special Tests* menu and select *Reprogramming*.
5. Follow the directions within Digital Wrench to install programming file xxxxxxxx.
