Re: EQ08-010 Defect Information Report; Vehicles Equipped with
Certain Refrigerators Manufactured by Dometic Corporation

Dear Mr. Smith,

KIBBI LLC, manufacturer of Renegade Custom Motor Homes and Trailers, has been advised by Dometic Corporation that certain Dometic refrigerators installed as original equipment in some of Renegade's recreational vehicles may contain a defect that relates to motor vehicle safety because they may experience a leak of pressurized coolant solution which can result in a vehicle fire under certain specific circumstances. On the basis of that Dometic determination, KIBBI LLC has decided that there may be a potential safety defect in its vehicles equipped with the identified refrigerators, and we are therefore submitting the enclosed Defect Information Report pursuant to 49CFR Part 573.

If you have any questions, please do not hesitate to contact me at the above address or telephone Extension # 123.

Sincerely,

DEFECT INFORMATION REPORT

1. Manufacturer's name/address:

KIBBI LLC
Renegade (trade name)
52216 State Road 15
Bristol, Indiana 46507
Telephone 574.848.1126

2. Vehicles Involved:

The vehicles covered by this Report are Renegade (trade name) truck conversions and trailers that were equipped with certain models of refrigerators manufactured by Dometic Corporation between June 2003 and September 2006.

The vehicles covered by this Report are those manufactured during the period from August 2003 through November 2006 because it is likely there was a lag between the time the refrigerators were manufactured and the time that they were installed in vehicles.

3. Total number of vehicles:

The total number of vehicles covered by this report is 831 truck conversions and 603 trailers or a total of 1,434 vehicles.

4. Approximate percentage of vehicles estimated to actually contain the defect:

Based on information received from Dometic, Renegade believes that approximately .005 percent of these vehicles actually contain the defect.

5. Description of the defect:

Under some circumstances, a fatigue crack can develop in the boiler tube of the covered refrigerators, which can permit the release of pressurized coolant solution. If this solution is exposed to an ignition source under certain specific circumstances, it can result in a vehicle fire.

6. Chronological summary of events leading to this determination:

Dometic advised KIBBI LLC of its defect determination by letter dated June 19th 2008. Renegade is aware of only 1 fire in its vehicles that appear to be related to this defect. Nevertheless after reviewing the matter, Renegade decided to submit this defect report.

7. Program for remedying the defect:

Dometic has arranged to conduct a recall to remedy the potential defect in Renegade's vehicles at no charge to vehicle owners. See Recall No. 08E-032. Pursuant to 49 CFR 573.6 (c) (8) (i) and 573.13, owners will be advised that Dometic will reimburse them if they have incurred costs to obtain a remedy for a refrigerator containing such a defect prior to their receipt of the notification. Renegade recognizes that as a final stage vehicle manufacturer it remains responsible for the successful completion of the recall campaign.

8. Furnish a final copy of all notices, bulletins and other communications that relate directly to the defect or noncompliance and which are sent to more than one manufacturer, distributor or purchaser.
