

# Mack Trucks, Inc.

## **Safety Recall**

### **ALERT**

**Date:** April 2, 2008 **Number:** SRA-533-008  
**To:** All U.S. & Canadian Distributors  
**Attention:** Service Manager, Warranty Manager, Parts Manager, Dealer Principal  
**From:** Regulatory Affairs Department  
**Subject:** Safety Recall, SC0337, Check Valve.

#### Safety Recall Summary:

On certain Mack model vehicles manufactured from August 2005 through March 2006, a check valve was omitted from the secondary supply port of the SR-7™ Spring Brake Modulating Valve. As a result, an air leak in the secondary or primary system may result in the park brakes inadvertently applying.

Also, the internal rubber check valve inside the Spring Brake Modulating Valve can become deformed over time, which could potentially result in a delay, or failure to apply the park brakes when pulling the yellow park brake control knob on the dash.

The number of vehicles affected is approximately 218 (all US).

#### Dealer's Responsibility:

The National Traffic and Motor Vehicle Safety Act and Canadian Motor Vehicle Safety Act requires dealers to ensure that all new and used vehicles are free of safety defects and comply with all relevant safety standards at the time of delivery to the consumer.

Dealers should make their personnel aware of the safety recall. In the event that a dealer has a vehicle included in the safety recall in their inventory to be sold, the condition must be corrected before releasing it to a customer.

#### Release Schedule:

- Repair Instructions are tentatively scheduled for release no later than April 10, 2008.
- Vehicle list is tentatively scheduled to be posted on the Trucks Dealer Portal April 2, 2008.
- Owner Notices are scheduled to be mailed on or before April 15, 2008.

#### Questions:

Contact the Regulatory Affairs Department at [vtna.regulatoryaffairs@volvo.com](mailto:vtna.regulatoryaffairs@volvo.com) if you have questions.
