DEFECT NOTIFICATION

Dear Customer:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act of U.S.A.

Prévost Car Inc. has decided that a defect which relates to motor vehicle safety exists in certain 2004-2008 XLII-45 coaches, X3-45 coaches, H3-41 and H3-45 coaches.

ZF has determined that a defect which relates to motor vehicle safety exists in the item of the motor vehicles listed above. A cell phone or a Blackberry placed in the proximity of the ZF Friedrichshafen Arens Astronic gear shifters, P/Nos.0501 214 599 and 0501 212 979, installed as original equipment on the above-mentioned coaches, could cause the display to change from "R" (reverse) to "2" (second gear) should the phone receive a call. The cause is the cell phone interference due to the combination of several reasons: Shifter layout and susceptibility to radiation and cell phone frequency.

Prevost asks its customers to install the supplied stickers **immediately**. A new software version will be downloaded later on to prevent this situation from happening.
