Kwik-Loc Corp. Customer

Re: Safety Recall EQ07-007 *08V-123*

Dear Customer:

A potential safety issue with the following items has been brought to the attention of Kwik-Loc Corp.:

- SAF Holland Fifth Wheel Models:
 - Simplex SE
 - Simplex II SE
 - Simplex II SE RH

In a letter dated October 18, 2007, Volvo Trucks North America (Volvo) reported that certain Volvo model vehicles, manufactured with SAF Holland Simplex fifth wheels, contained a safety related defect. Volvo states that a latch lever pivot bolt assembly in the fifth wheel assembly may have been over-tightened by Holland. Further, that an over-tightened bolt can distort the pivot bolt spacer sleeve, which may prevent the fifth wheel latch jaw from closing and latching securely around the trailer king pin. This could result in a detached trailer. If a trailer detaches while the vehicle is in motion, a crash can occur. NHTSA assigned recall number 07V-496 to this matter. Freightliner LLC (Freightliner) filed a similar safety defect report (07V-530) on November 6, 2007, referencing similar fifth wheels and citing the same safety concern.

These fifth wheels were also sold to Kwik-Loc Corp. from January 3, 2006 through May 16, 2007 and might affect Kwik-Loc Corp. dollies with VIN #'s ending in 003896 thru 004086.

Please use the attached Warranty Claim sheet to obtain the replacement kit from SAF Holland. Please fill it out and fax it to SAF Holland – 800-356-3929. They will send you the repair kit and allow 15 minutes of labor against SAF Holland - PO 405180. If you require further assistance you can contact Pam Seeger, SAF Holland, Warranty/Technical Supervisor, PH 231-777-4373, FX 800-356-3929.

Please feel free to contact Kwik-Loc Corp. for assistance.

Regards,
Scott Nighswander
President
