New Mailing August 11th, 2008

Subject: Sport Trailers and Dometic Refrigerator Recall. NHTSA Recall Campaign Numbers 08E-076 (first mailing) and 08E-032 (new mailing).

Dear Valued Customer:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

REASON FOR THIS RECALL

Sport Trailers has decided that a defect which relates to motor vehicle safety exists in certain vehicles it manufactured equipped with Dometic refrigerators. This decision was based on information provided by Dometic Corporation that a defect exists in some of the refrigerators that Dometic manufactured between April 1997 and May 2003 (first mailing 08E-076), June 1 of 2003 and September 30 of 2006 (new mailing 08E-032), for installation in recreational vehicles. Sport Trailers installed these refrigerators in recreational vehicles that it manufactured from April 1997 to November 2002 (first mailing 08E-076), and June 2005 to February 2006 (new mailing 08E-032).

The Problem:

A fatigue crack can develop in the boiler tube of the identified refrigerators, which can permit the release of pressurized coolant solution. If this solution is exposed to an ignition source under certain specific circumstances, it can result in a vehicle fire.

Affected Units:

**The potentially affected refrigerators have the following model numbers:
NDR1062, RM2652, RM2662, RM2663, RM2852, RM2662, RM3662, RM3663, RM3862, RM3863**

The possibly affected units have serial numbers beginning with the following combinations:

713xxxx through 752xxxx	320xxxx through 352xxxx
801xxxx through 852xxxx	401xxxx through 452xxxx
901xxxx through 952xxxx	501xxxx through 552xxxx
001xxxx through 052xxxx	601xxxx through 639xxxx
101xxxx through 152xxxx	
201xxxx through 252xxxx	
301xxxx through 319xxxx	

If you own one of the above units, it requires immediate service and continuing use could pose a potential safety hazard.

WHAT WE WILL DO

Sport Trailers, in cooperation with Dometic, will provide owners of all covered refrigerators a rework for the potential defect at no charge for parts or labor. The rework consists of secondary burner housing, a thermal fuse and a melt fuse.

WHAT YOU SHOULD DO

How Do I Know if My Refrigerator is Being Recalled?

- 1) Find your refrigerator's model and serial numbers by opening the refrigerator door and looking for the sticker attached to the side wall of the interior. See the photo instructions included in this mailing for the exact location of the sticker.
- 2) Call 1-888-446-5157 or go to www.DometicUSA.com to confirm if your refrigerator is affected by the recall.

What to Do:

- 1) Turn the refrigerator off immediately if you notice any of the following indicators:
 - Leakage or staining at the back of the refrigerator.
 - Yellow residue at the back or sides of the refrigerator.
 - The smell of ammonia.
 - Refrigerator does not properly cool.

Any unit found to have one or more of the characteristics mentioned above **MUST** be shut down and not operated until the unit is fixed and the recall rework administered.

For any unit that does fall within the recall population, but does not exhibit any of the four indicators mentioned in #1, consider the following:

- 2) Do not operate your refrigerator on LP gas. Switching to electric power lowers the incident rate associated with LP gas. If you own a 3-way refrigerator, running the unit on 12-volt power carries the least risk of all. 3-way refrigerators have model numbers that end in "3".

Dometic recommends that the unit not be operated on electric unless absolutely necessary until your unit has been serviced. If you choose to operate your unit on electric power prior to the recall rework, you must inspect the burner area weekly for any of the indicators referenced in number 1 above.

- 3) Dometic recommends that you turn off the gas valve at the back of your refrigerator. **DO NOT**, however, attempt to disconnect the gas supply. Instructions on how to turn off the gas valve are included in this envelope.
- 4) If you must operate your refrigerator on electric, **DO NOT** operate your refrigerator while in transit or while occupants are asleep.
- 5) The rework kit is available. Please call your preferred service center to set up an appointment. For help in locating a service center, or for the most up-to-date recall information, call 1-888-446-5157.

Please do not simply go to a dealer or service center without an appointment, since some facilities will not be performing this work, and the ones that are doing the work will need to obtain the appropriate parts from us. Please bring this letter with you at the time of your scheduled service.

- 6) **If the repair facility fails or is unable to rework this noncompliance without charge and within a reasonable time, please contact us at the number provided above so we can attempt to resolve the problem. You may also submit a written complaint to the Administrator, National Highway Traffic Safety Administration, 1200 New Jersey Avenue, SW, Washington, DC 20590; or call the toll-free Vehicle Safety Hotline at 1-888-327-4236 (TTY: 1-800-424-9153); or go to <http://www.safercar.gov>.**
- 7) **If you previously paid to repair or replace a Dometic refrigerator that failed due to this defect, you can be reimbursed for your costs pursuant to Dometic's Pre-Notification Reimbursement Program. To be eligible for reimbursement under that Program, you must complete and submit the required form and provide the necessary documentation. The Program and form can be obtained by calling 1-888-446-5157.**

If You No Longer Own This Recreational Vehicle:

If you are no longer the owner of the recreational vehicle, we would greatly appreciate you furnishing us with the name and address of the new owner by calling 1-888-446-5157.

You May Receive More Than One Mailing In Regards To The Recall:

To reach as many customers as possible, Sport Trailers and Dometic will each send notifications in regards to this recall. Be advised that though you may receive multiple notifications, all pertain to this same, single recall.

Your safety and satisfaction with your Sport Trailers product are important to us and we regret any inconvenience to you.

Sincerely,

Sport Trailers

The Value

Dometic Corporation has announced a voluntary recall of two-door refrigerator units manufactured between June 1, 2003 and September 30, 2006. In order to minimize potential costs and inconveniences for your company, Dometic has contracted with Stericycle ExpertRECALL to assist in managing this event.

Stericycle ExpertRECALL's proven experience brings value added solutions to every recall situation:

- Stericycle recall services will be billed to and paid directly by Dometic Corporation.
- The 800# for this recall assures that all customers receive a common and correct message regarding the recall.
- Customer notifications and their responses (or lack of response) are tracked and documented in Stericycle's web-accessible system... making it easy for you to accumulate information for your required quarterly reports to NHTSA.
- Timely reimbursement for repairs increases dealer satisfaction and helps you to maintain quality relationships.

Should your company need assistance, let Stericycle ExpertRECALL guide you through the entire recall process to protect the public, protect your brand and efficiently close out your event while limiting liability and risk.

Dear Valued Customer:

IMPORTANT RECALL INFORMATION
PLEASE RESPOND IMMEDIATELY
RECALL CAMPAIGN NO. 08E-032

I am writing to inform you of a voluntary recall campaign with respect to a potential safety-related defect in certain two door refrigerator units manufactured by Dometic, LLC ("Dometic") between June 1, 2003 and September 30, 2006 and to advise you of what Dometic will do and what you should do with respect to this recall. This is an expansion of Dometic's previous recall, announced in August of 2006.

Dometic has created a program that minimizes the strain on your organization's resources and personnel, minimizes your administrative costs, and creates a closed-loop data flow. We have retained recall expert Stericycle Incorporated ("Stericycle") to assist involved original equipment manufacturers in this campaign if they make the election, all at Dometic's cost. Information regarding Stericycle is enclosed with this letter (Enclosure No. 1). Information regarding this election is set forth below.

COVERED PRODUCTS

The following is a list of the specific model numbers of the refrigerators covered by this recall. Our records indicate that some of those refrigerators may have been installed as original equipment in recreational vehicles manufactured and sold by your company. See the instructions for finding the serial number of the fridge on the lower right corner of this page.

The refrigerators being recalled have one of the following model numbers as well as one of the following serial numbers:

MODEL NUMBERS:

NDR1062, RM2652, RM2662, RM2663, RM2852
RM2862, RM3662, RM3663, RM3862

SERIAL NUMBERS:

320xxxxx through 352xxxxx 401xxxxx through 452xxxxx
501xxxxx through 552xxxxx 601xxxxx through 639xxxxx

PROBLEM DESCRIPTION:

After some period of use, a fatigue crack may develop in the boiler tube of the covered refrigerators that may release a sufficient amount of pressurized coolant solution into an area where an ignition source may be present. Potential ignition sources in this area include the refrigerator's propane burner and/or electric heating element. If this were to occur under certain conditions, the coolant could ignite and result in a fire. On the basis of these facts, Dometic has determined that the refrigerators may contain a defect that relates to motor vehicle safety. We have notified the National Highway Traffic Safety Administration (NHTSA) of this determination, and we will be conducting a recall of the covered items pursuant to Campaign No. 08E-032. To access Dometic's original NHTSA notification, you can view or print a copy at www-odi.nhtsa.dot.gov/recalls/recallsearch.cfm. Type in 08E032 in the campaign # search box, then click on "Document Search."

WHAT WE WILL DO:

Dometic will offer to provide owners of all covered refrigerators a rework for the potential defect at no charge for parts or labor. The kit is available now. The rework consists of a secondary burner housing, a thermal fuse and a melt fuse. A Data Collection card will be included with each kit. The installer will fill out the card and drop it in the mail. This ensures prompt payment for the installer, and a closed information loop for both Dometic and the OEM. However, as explained below, we will need your assistance in identifying the current owners of the vehicles in question.

Where to find the serial and model numbers on your Dometic refrigerator

The serial and model numbers are both located on a sticker inside the fridge door. It could be on either side of the interior.

Remember, the model number starts with RM or NDR, and the serial number is 8 digits long.
